

Capstone project

Emanuela Troianiello

Un error EP - 3 songs so far

All reggaeton, sung in spanish the theme is the stages you go through when you're infatuated with someone. All the songs have a storyline i did that intentionally

1. Me llaman
2. Pa casa
3. Un error

Process and Struggles

I did the projects with the help of my producer, we recorded every two weeks in the studio and came up with these songs. He created the beats on Pro Tools besides “Pa Casa”. While i wrote all the lyrics and created the vocals and melodies. The challenge was showing up to the studio and finding the concepts.

I helped create the idea for the beat of un error which is my fav song. The other two were mostly us just trying to find the correct sounds that sound good together.

Things I've learned

- I learned to not get frustrated when I couldn't think of lyrics and just let it come to me, and I learned to make my vision into reality by hearing things over and over and finding what works and what doesn't although sometimes starting fresh is the best thing to do.
