Hiring Manager  
Con Edison  
4 Irving Place New York, NY 10003  
February 2, 2026

Dear Hiring Manager,

My name is Edgar Sanchez, and I am currently a first-year college student majoring in Electrical Engineering. I am writing to express my interest in pursuing a future career with Con Edison and to share my background, education, qualifications, and professional goals. As someone who has grown up in New York City, I am interested in working for a company that plays a direct role in powering the city and supporting sustainable energy systems.

I was born and raised in the South Bronx and both of my parents are from Mexico. Growing up in an immigrant household taught me the importance of discipline, responsibility, and persistence. As a first generation college student, I have faced challenges such as limited access to resources and the pressure to succeed academically, but these experiences have strengthened my motivation and commitment to building a successful career in engineering.

One of the experiences that most influenced my interest in professional work was a program I participated in at J.P. Morgan beginning in April 2023. This was a two to three month program where I was introduced to financial concepts such as stocks, bonds, and 401(k) plans. Through this experience, I gained valuable insight into long-term wealth building and investment strategies, which led to a final presentation on market trends, risk management, and the

importance of diversification. After this initial experience, I continued my professional development through a second internship with J.P. Morgan as part of the CareerWise program, which I am currently in. In this role, I have worked with data-driven tools such as Alteryx and Tableau. Alteryx is a data analytics platform used to clean, organize, and automate data workflows, while Tableau is a data visualization tool used to build interactive dashboards. These experiences have helped me better understand how large organizations operate and have strengthened my technical, analytical, and problem-solving skills in real-world environments.

My major in Electrical Engineering connects directly to my long-term goals because I want to work in fields that focus on energy systems, infrastructure, and sustainability. I am especially interested in renewable energy, smart power grids, and improving energy efficiency across large cities. Con Edison's work in modernizing electrical systems and investing in clean energy aligns with my desire to use engineering to reduce environmental impact and improve quality of life communities such as NYC.

Thank you for taking the time to review my letter and consider my background and goals. I appreciate the opportunity to share my interest in engineering and in contributing to a company that serves New York City in such an important way. I would welcome the chance to learn more about opportunities with Con Edison and how I can continue developing my skills within your organization. I am grateful for your consideration and look forward to any future possibility of connecting.
