Re: Constructing a paper airplane Final Draft

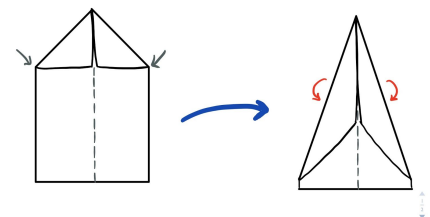

Steps for constructing this paper plane:

1. Hold the paper in a vertical position upright (long way)
2. Fold the paper in half vertically
3. Unfold the paper and flip it over
4. Fold the top right and left corners together inward until the corners meet

5. Take the outer corners and fold the left and right corners inward until they meet the crease in the middle
6. Flip the paper over
7. Use the crease in the middle to fold the page vertically

8. Fold the top outer edges in half to meet the bottom edge
9. Flip the system over and repeat step eight on this side
10. Open wings up
