Mission
The Research Chefs Association cultivates collaborations between the chefs and food science professionals who develop food to increase innovation, quality and speed-to-market.

Vision
As a pioneer in the discipline of Culinology®, the Research Chefs Association integrates food science and culinary arts expertise to elevate product development.

Founded
Formed in 1996 by a group of food professionals with a common interest in the burgeoning field of food research and development, the Research Chefs Association (RCA) has rapidly grown to approximately 2,000 members. RCA has become the premier source of culinary and technical information for the food industry.

Culinology®
What is the discipline of Culinology®? It is the blending of the culinary arts and food sciences.

Certification

RCA offers unique credentials and powerful, value-added skills to its members through certification programs for both the Certified Research Chef (CRC®) and Certified Culinary Scientist (CCS®).

Education

RCA approves Culinology® degree programs across the nation, with several fully integrated programs currently in session at 13 partnering colleges and universities.

Continuing education workshops are also offered year-round for both chefs and food technologists.

Annual Conference & Culinology® Expo

Every spring members convene for the only educational and professional conference for research chefs and food scientists that focuses on the fast-growing discipline of Culinology®.
