General Description

Under the direction of the EHS department, the WWTP technician operates the Moroni City Waste Water Treatment Plant (WWTP).

Job Specific Duties

1. Operate the WWTP on a daily basis, as scheduled.
2. Test and sample water flows, interpreting results and making corrective actions and adjustments as appropriate, ensuring an optimum, efficient and economical operation.
3. Keep WWTP facility and equipment clean and in top operating condition. Make minor repairs and adjustments when necessary, assuming full responsibility for such operations.
4. Make various and periodic visual inspections to ensure plant is operating at specified performance levels.
5. Mow lawn and up keep on grounds as needed.

Work Experience Requirements

1. Demonstrated ability to work with hands and to work in mechanically oriented situations following instructions, given either orally or in writing, of a supervisor.
2. General knowledge of various types of equipment used in the building trades.
3. Ability to lift and properly move at least 100 lbs. good general physical condition.
4. Ability to run and interpret plant test results to insure proper operations.

5. Ability to work well with others and public.

Education Requirements

1. Demonstrated experience in waste water treatment
2. CDL certification preferred.
3. Requires grade 4 State of UT wastewater operator's certification or ability to obtain one (1) in a timely manner.
4. Must be able to navigate internet and computer skills including Microsoft Word and Excel.
