

- **Location-identifying Technologies**

GPS (global positioning systems) software, geo-filtering and other location-aware technologies, such as beacons and geo-fences, locate (sometimes precisely) you, or make assumptions about your location, for purposes such as verifying your location and delivering or restricting content based on your location. Subject to certain options and controls you may have, if you have enabled GPS, Bluetooth, wi-fi or use location-based features on the Service, your device location may be tracked.
