WINNING

doesn't happen by **A C C I D E N T .**

A rub. It's all that separates a flawless round from "better luck next time." But you're not depending on luck. You're depending on countless hours in and out of the saddle. And you didn't come here for just a ribbon. You came for the championship ribbon. So ask yourself, does your horse have the stomach to win?

Time for a gut check. **TheStomachToWin.com**

ULCERGARD[®]

Equioxx®
(firocoxib) a Merial product

Rx

Confidence inside and out.

Proven. Safe. Convenient.

Your choice for your equine partner's inflammation and pain management is important. When you do the research, you'll find EQUIOXX – the first and only coxib nonsteroidal anti-inflammatory drug for horses – is the right choice.

Proven – To effectively control the pain and inflammation associated with osteoarthritis

Safe – At the recommended dose, most horses had no side effects

Convenient – One dose a day controls pain up to 24 hours

Time to put your old NSAID out to pasture. Talk to your veterinarian about EQUIOXX.

EQUIOXX.com

**Three formulations to fit your needs
in and out of competition: Injection, Paste and Tablet.**

IMPORTANT SAFETY INFORMATION: As with any prescription medication, prior to use, a veterinarian should perform a physical examination and review the horse's medical history. A veterinarian should advise horse owners to observe for signs of potential drug toxicity. As a class, nonsteroidal anti-inflammatory drugs may be associated with gastrointestinal, hepatic and renal toxicity. Use with other NSAIDs, corticosteroids or nephrotoxic medication should be avoided. EQUIOXX has not been tested in horses less than 1 year of age or in breeding horses, or pregnant or lactating mares. For additional information, please refer to the prescribing information or visit www.equioxx.com.

©2017 Merial, Inc., Duluth, GA. All rights reserved. EQUIOXX1705-A (1/17)

CAUTION: Federal law restricts this drug to use by or on the order of a licensed veterinarian.

EQUIOXX® (firocoxib) is indicated for the control of pain and inflammation associated with osteoarthritis in horses. Firocoxib belongs to the coxib class of non-narcotic, non-steroidal anti-inflammatory drugs (NSAID).

CONTRAINDICATIONS: Horses with hypersensitivity to firocoxib should not receive EQUIOXX.

WARNINGS: EQUIOXX is for use in horses only. Do not use in horses intended for human consumption. Do not use in humans. Store EQUIOXX Tablets out of the reach of dogs, children, and other pets in a secured location in order to prevent accidental ingestion or overdose. Consult a physician in case of accidental human exposure.

Horses should undergo a thorough history and physical examination before initiation of NSAID therapy. Appropriate laboratory tests should be conducted to establish hematological and serum biochemical baseline data before and periodically during administration of any NSAID. NSAIDs may inhibit the prostaglandins that maintain normal homeostatic function. Such anti-prostaglandin effects may result in clinically significant disease in patients with underlying or pre-existing disease that has not been previously diagnosed.

Treatment with EQUIOXX should be terminated if signs such as inappetence, colic, abnormal feces, or lethargy are observed. As a class, cyclooxygenase inhibitory NSAIDs may be associated with gastrointestinal, renal, and hepatic toxicity. Sensitivity to drug-associated adverse events varies with the individual patient. Horses that have experienced adverse reactions from one NSAID may experience adverse reactions from another NSAID. Patients at greatest risk for adverse events are those that are dehydrated, on diuretic therapy, or those with existing renal, cardiovascular, and/or hepatic dysfunction. The majority of patients with drug-related adverse reactions recover when the signs are recognized, drug administration is stopped, and veterinary care is initiated.

Concurrent administration of potentially nephrotoxic drugs should be carefully approached or avoided. Since many NSAIDs possess the potential to produce gastrointestinal ulcerations and/or gastrointestinal perforation, concomitant use of EQUIOXX with other anti-inflammatory drugs, such as NSAIDs or corticosteroids, should be avoided. The concomitant use of protein bound drugs with EQUIOXX has not been studied in horses. The influence of concomitant drugs that may inhibit the metabolism of EQUIOXX has not been evaluated. Drug compatibility should be monitored in patients requiring adjunctive therapy.

The safe use of EQUIOXX in horses less than one year of age, horses used for breeding, or in pregnant or lactating mares has not been evaluated. Consider appropriate washout times when switching from one NSAID to another NSAID or corticosteroid.

The Safety Data Sheet (SDS) contains more detailed occupational safety information. For technical assistance, to request an SDS, or to report suspected adverse events call 1-877-217-3543. For additional information about adverse event reporting for animal drugs, contact FDA at 1-888-FDA-VETS, or <http://www.fda.gov/AnimalVeterinary>.

Meet our first Equine Ambassador! **Lafitte De Muze**

Owned by Cheryl Olsten & Ridden by Amanda Steege

EQUUS Foundation Equine Ambassadors are sport horses whose owners donate a portion of their winnings in equestrian sport competitions to support the mission of the EQUUS Foundation.

Most horses will have multiple homes during their lifetime, but thousands of horses suffer from abuse, neglect and being shipped off to slaughter each year.

Help safeguard the comfort and dignity of all of America's horses and provide opportunities for horses to share their magic with as many people as possible - especially people with special needs.

There's no greater gift you can give than to have your equine partner pay it forward! Join us for the love of horses!
