DB2 for z/OS as a Modern Enterprise Data Warehouse

October 6, 2015
Issue 10

Ludovic Janssens

The modern enterprise data warehouse needs to be a heterogeneous mix of integrated software to handle a wide variety of data sources both structured, semi-structured and unstructured. The combination of DB2 with Hadoop is one approach that meets the needs for this diverse set of data.

Last Month at IDUG.org

Catch up with all things IDUG and stay up-to-date on the latest DB2 trends. Click the links below for a look at last month's hot topics.

Advanced SQL is all around us, so we better speak the language
The new SQL Reference for Cross-Platform Development has arrived
XMLModify function: sub-document update on an XML document
SELECT FROM data change table on DB2 for z/OS
Exploring the rich world of SQL OLAP functions - Moving Averages
DB2 11 for z/OS Application Developer - Part 1

Please note: You must log in to www.idug.org to view some content.

IDUG Volunteer Spotlight

Catch up with this month's featured volunteer, Paul Turpin, IDUG President Elect/Treasurer.

Q: What do you enjoy most about being a member of IDUG?
A: I really enjoy meeting fellow DB2 professionals and learning better ways to use DB2. I also like sharing my DB2 experiences with others.

Q: What would readers be the most shocked to learn about you?
A: My favorite pastime is riding quarter horses.

Q: How has IDUG contributed to your success as a DB2 professional?
A: I have learned many tips from fellow DB2 professionals and IBM speakers. I have also made hundreds of contacts within the DB2 community.

President's Letter

Bjarne Nelson on behalf of Anna Brodie, IDUG President

Hear from Bjarne Nelson on behalf of IDUG President Anna Brodie in this month's President's Letter.
