

Dear Family, Friends and Partners,

We Made It!

After five flights, carrying nine bags and juggling jet lag, Rosa, Hannah and Suzy made it to Tonj. They arrived to singing and clapping from the IDAT team and a warm welcome by the community and of course Sabet, made it so very special!

Our first priority was to visit Mama Sabet and the children in the home. The esophagus cancer has made it impossible for Mama to swallow and she has very little appetite. The family are using a feeding tube to give her small quantities of medida (porridge) and soup. She has lost so much body weight, now weighing about 50lbs and really just skin and bone. We moved her to the compound so we could care for her 24 hours a day.

Please pray for Hububba (grandma), she is in pain and very weak. She knows Jesus as her Savior and has peace about dying. Pray for the 14 grandchildren in her house that we can find sponsors to help us provide for their basic needs.

For just \$50 a child per month, you can email Rosa at info@indeedandtruth.org for more information, profiles on each child and a commitment response card.

The Macleods Return!

Steve and Larne Wilson arrived along with the Macleod family and Jono's youngest brother Anthony. All are from New Zealand and we are excited for the vision the Lord has given us for this next year of serving together in South Sudan.

Larne, Steve, Anthony, Macleod Family

Churches Adopt CHE!

CHE (Community Health Evangelism) is a big topic on our agenda and the Macleods really want to be involved in helping that program to keep going in the villages. We have 10 CHE centers around the Tonj area and we are praying for 10 supporting churches to each 'adopt' a center and commit to pray for our CHE program in that village. As we link our partnering churches with these villages our hope is that they can visit, get involved, train CHE's and make key relationships on the ground building on those relationships year after year. Our team will spend the next few months collecting data from the clinic patients about the challenges and needs the community are facing in their homes as well as recording which villages do not have churches etc. This will help us determine the direction our CHE program should go and the areas we should reach out to first.

From there we plan to start with three villages that we believe the Lord will clearly show us. We are planning a Training of Trainers (TOT1) 5 day workshop for our entire South Sudan team and if you'd be interested in learning more about CHE, attending a TOT1 training and receiving your TOT1 certificate we welcome you to join us. You can email us for info at: sabet-suzy_kuj@indeedandtruth.org

God is Working Here!

Meet Yar Achol and her son Chol. Our pastors met her in the clinic when she came out of total desperation.

Yar Achol and Chol

She had visited over 10 witch-doctors to get healing for her son, of which none worked and she run out of things to sell, so the Lord brought her to our clinic. Our doctors suspect the child has hydrocephalus. Surgery is not available in South Sudan and without it he may die. We shared with Achol about Jesus and she believes He brought her to us. After much counsel she decided to ask Jesus to be her Savior. Since praying the child has not had any seizures which were a regular occurrence. She said she now has peace and is not afraid of what will happen to Chol.

*Be still
and know
that I am
God*
-PSALM 46:10

In His Service,

Sabet & Suzy Kuj
