

## CHE Update!

Over the past month the CHE program has continued to progress well in the villages of Guaria, Warrack and Bobi. Health lessons on antenatal care, care of a newborn baby, & intestinal worms, and bible stories from the book of Genesis have been taught by our training team to the 12-15 CHEs (Community Health Evangelists) in each village.

**CHE Training Team, Pastors Synok, Judah and Joseph, going out to the villages to train the CHEs**

These CHEs have been visiting 5-10 neighboring homes per fortnight to pass on the health and spiritual lessons.

## Warrak Village CHEs

Homes or 'compounds' in South Sudanese villages typically have between 5-15 people, so the CHE teaching is now reaching over 500 people in each village! During the dry season when the harvesting has finished they will be visiting even more homes. These CHEs are all volunteers who are passionate about improving the health of their community, and spreading the gospel.

*"The plans of the diligent lead surely to abundance, but everyone who is hasty comes only to poverty."*

**– Proverbs 21:5**

## Making A Difference!

Newlyweds Amy and Travis, from New Zealand, are volunteering on short-term missions for five months. Travis, a contractor, has been working tirelessly to help us finish the medical clinic in time for the Grand Opening on October 28th. This week our family got to jump in and help out. We normally spend a day doing an outreach to a specific community but due to heavy rains, this has been increasingly difficult to get into villages. So we agreed to shift our focus to helping finish the New Medical Clinic. For this week's service project, we were blessed to have fellow missionary kids from Every Village join us for painting the new clinic's office building!

**Kids (ages 3 to 15) painting the New Clinic Offices**

While Travis has been working around the clock on the clinic, his wife has been overseeing the observation ward and managing the care of inpatients. With August being our busiest month due to malaria, she definitely had her work cut out with every bed full and 3 sets of twins! She diligently helped the mothers with nursing and supplement feeds to insure each baby was 2 kg before going home. She has led some community health worker training in basic nursing skills and monitored the care to each patient.

This has really freed the doctors and allowed us to see more patients. And she has organized our stock control, saving us hours of reporting and paperwork!

**Amy and Travis with one set of twins**

## The New Ward!

Our new clinic is an out-patient facility but we are very aware of the growing need to accommodate more inpatients. We have the land to build a large ward next to the new clinic. Here's where YOU CAN MAKE A DIFFERENCE and jump in to help. We have an opportunity for you to contribute a financial gift towards us building this much-needed ward and every gift will be generously matched by "Kiwi's for South Sudan" up to \$25,000!! That's right, your donation doubled!!! We'll have enough to finish the ward quickly and furnish it!! We're also in need of a project manager to oversee the team building this ward. If you feel gifted in this area we are looking for a 3-month commitment, please email us.

## Prayer Requests!

- Clinic to be ready for the opening on October 28th.
- CHE's in the villages.
- Provision for new ward.
- Continued protection over our families and ministry.

*Serving Him,*

*Sabet and Suzy*
