

PYH Members,

Just a few days ago we provided everyone with an update, but since then, there have been further changes adopted by the state of Massachusetts, the Pembroke BOH and in turn Pembroke Youth Hockey. Additionally, we've made some changes to the Hat Trick Test and select areas of our protocols. Please continue to communicate all instances of symptoms, exposures and positive cases with our COVID Safety Committee.

As a reminder, for all PYH activities:

- Everyone must get fully dressed outside and not bring any bags inside any rink.
- Masks should be worn at all times by everyone.
- Coaches, players, and spectators should be adhering to social distancing.
- Follow each rink guidelines for spectator policy.

“Titan Hat Trick Test” for guardians of each participant shall certify before they enter any rink:

1. My child has not experienced any symptoms of COVID-19 in the past 14 days (fever, cough, shortness of breath or difficulty breathing, chills, muscle ache or pain, sore throat, or loss of taste or smell).
2. My child has neither tested positive for COVID-19 in the past 14 days nor awaiting test results, and not been in close contact with anyone (including household) that has tested positive for COVID-19 or experienced symptoms of Covid-19 in the past 14 days.
3. My child has not travelled to a state other than those designated as low-risk, but if so, has followed state protocol, filled out a Massachusetts Travel Form, and quarantined for 14 days or had a negative COVID-19 test within 72 hours of return or since returning.

If a PYH player or coach becomes symptomatic – PYH Process

- Keep name anonymous. Parent is to report to a PYH COVID-19 Co-Chair.
- Player or coach will self-isolate and may return to PYH activities when the following criteria have been met:
 - Self-isolated for at least 10 days from the onset of symptoms date (return on day 11)
 - 24 hours with no fever without the use of fever-reducing medications
 - Other symptoms of COVID-19 are improving
- Guidelines are subject to change at any time, and response is based on current CDC, Commonwealth of MA and Town Board of Health guidelines.

If a PYH player or coach test positive – PYH Process

- Keep name anonymous. Parent is to report to a PYH COVID-19 Co-Chair.
- PYH will start investigation into everyone with close contact 2 days prior before onset of symptoms or date swab was obtained if no symptoms exist through date of last exposure during PYH activities, beginning with on ice supervisor and check attendance records.

- PYH will notify local Board of Health, League, Opposing Team, Facility Operator, and Referee Coordinator if necessary.
- PYH will notify any members of the exposure and if deemed close contacts after consultation with the local Board of Health.
- Player or coach will self-isolate for at least 10 days from the test date and may return to PYH activities if they remain asymptomatic the entire time (return on day 11).
- If the player/coach becomes symptomatic, from that date they will follow instructions from, **'If a PYH player or coach becomes symptomatic – PYH Process'**.
- Entire teams if placed in self-quarantine or self-isolation will return to PYH events after day 14 (regardless of individual test out status).
- Guidelines are subject to change at any time, and response is based on current CDC, Commonwealth of MA and Town Board of Health guidelines.

If a PYH player or coach is deemed a close contact by PYH and/or state and local Board of Health and/or contact tracing:

- Keep name anonymous. Parent is to report to a PYH COVID-19 Co-Chair.
- Player or coach will self quarantine according to the state quarantine guidelines (listed below).

OPTIONS	CRITERIA	ACTIVE MONITORING	RESIDUAL RISK
7 days of strict quarantine	<u>Release on Day 8 IF:</u> <ul style="list-style-type: none"> • A test (either PCR or antigen) taken on Day 5 or later is negative; AND • The individual has not experienced any symptoms up to that point; AND • The individual conducts active monitoring through Day 14 	Individual must actively monitor symptoms and take temperature once daily. IF even mild symptoms develop or the individual has a temperature of 100.0 F, they must immediately self-isolate, contact the public health authority overseeing their quarantine and get tested.	Approximately 5% residual risk of disease development
10 days of strict quarantine	<u>Release on Day 11 IF:</u> <ul style="list-style-type: none"> • The individual has not experienced any symptoms up to that point; AND • The individual conducts active monitoring through Day 14. • No test is necessary under this option 		Approximately 1% residual risk of disease development
14 days of strict quarantine	<u>Release on Day 15 IF:</u> <ul style="list-style-type: none"> • The individual has experienced ANY symptoms during the quarantine period EVEN if they have a negative COVID-19 test; OR • The individual indicates they are unwilling or unable to conduct active monitoring. 	No additional active monitoring required	Maximal risk reduction

- If a player or coach is returning after day 7, PYH requires proof of a negative PCR or antigen test taken on day 5 or later (non full team related) to a PYH COVID-19 Co-Chair.***

- Entire teams (and borrowed players) if placed in self-quarantine or self-isolation will return to PYH events after day 14 (regardless of individual test out status). No proof of test required as no day 7 (or 10) return to play is allowed.
- Guidelines are subject to change at any time, and response is based on current CDC, Commonwealth of MA and Town Board of Health guidelines.

***Please be aware that any negative test result BEFORE day 5 does not allow you out of self-quarantine after day 7. Also, if you test positive during self-quarantine, to the extent that you do not self-isolate yourself from other members of your household, their close contact self-quarantine restarts each day until your recovery.

Thank you for your continued diligence and commitment to these frequently changing guidelines. If you have any questions or concerns, please let us know.

Thank you,

Pembroke Youth Hockey COVID Safety Committee

COVID-19 Symptoms – check online: <https://www.mass.gov/how-to/check-your-symptoms-for-covid-19-online>

Symptoms may appear 2-14 days after exposure to the virus and may include:

- Fever, chills or shaking chills
- Signs of a lower respiratory illness (e.g., cough, shortness of breath, lowered oxygen saturation)
- Fatigue, sore throat, headache, body aches/myalgia, or new loss of sense of taste or smell
- Other less common symptoms can include gastrointestinal symptoms (e.g. nausea, vomiting, diarrhea), rash, and inflammatory conditions such as “COVID toes”.
- In elderly, chronically ill, or debilitated individuals such as residents of a long-term care facility, symptoms of COVID-19 may be subtle such as alterations in mental status or in blood glucose control

Get tested: MA State COVID-19 Test Site Locator:

<https://memamaps.maps.arcgis.com/apps/webappviewer/index.html?id=eba3f0395451430b9f631cb095febf13>

How do I know if I am a close contact of someone with COVID-19?

- You are a close contact of a COVID-19 positive person if you were within 6 feet of them, for at least 10-15 minutes (over a 24 hour period), while they were symptomatic or within the 48 hours before symptom onset.
- You are also a close contact if you were within 6 feet for at least 10-15 minutes (over a 24 hour period) of someone who tested positive for COVID-19 in the 48 hours before their test was taken or anytime in the 10 days after the test.
