

Why You Can't Test Out of COVID-19 Quarantine*

*Quarantine = staying home/away from others for 14 days after close contact with someone with COVID-19 to make sure you don't get sick/infect others.

Possibly exposed to COVID-19?

Quarantine at home for 14 days.

You cannot test out of quarantine.

Even if you test negative, stay home for 14 days.

A negative test only shows you are not infected on the day tested during the 14 day quarantine.

You can still test positive and/or become sick during the 14 day quarantine.

It is important to complete the entire 14 day quarantine.

After 14 days if you have no symptoms, your quarantine is over.
