

Shelby Ball

An All-Volunteer Organization

SYB Guidline

1.10 EXCESSIVE HEAT: To protect player and volunteer health, any outdoor games and/or practices will be cancelled on any day in which the heat index (based on degrees Fahrenheit and relative humidity) reaches 104 degrees or above. The heat index will be reported by local weather stations in the summer.

Our decision will be based on the the projected heat index for 5:00p.m. and we also reserve the right to end games and send everyone home if it reaches 104 degrees during practice or games. If a coach has not notified you of a cancellation or if it is not posted on this website, please plan to play the games as scheduled.

Drink water. It's summertime.
