- The build out line promotes playing the ball out of the back in a less pressured setting
 - When the goalkeeper has the ball in his or her hands during play from the opponent, the opposing team must move behind the build out line until the ball is put into play
 - Once the opposing team is behind the build out line, the goalkeeper can pass, throw or roll the ball into play (punts and drop kicks are not allowed)
 - After the ball is put into play by the goalkeeper, the opposing team can cross the build out line and play resumes as normal
 - The opposing team must also move behind the build out line during a goal kick until the ball is put into play
- 20.3 Refer to the STTL website for an explanation of how to apply the build out line.
