Framingham Girls Fastpitch Softball (FGFS) is a nonprofit, youth recreational softball program that provides girls in grades K-8 the opportunity to play softball, develop softball skills, build lasting friendships, and most importantly, have fun. Over the past 3 years, FGFS has grown by more than 30%, now fielding 225+ kids on 20 teams in the spring.

Our growth and program success model can directly be attributed to providing a strong product through a reliable and consistent organizational approach. All coaches attend clinics on how to improve coaching skills, and a variety of opportunities are available to our players. We offer indoor winter clinics at Metrowest Sports Center in Ashland, including pitching, catching, hitting, and fielding clinics. In addition, we just completed our third consecutive season of fall softball, and we also offer summer travel softball teams. In short, we have become a year round program!

As enthusiasm continues to grow, we have made significant investments in our equipment, we've added three-season batting tunnels at our Walsh/Dunning complex, and have recently worked with the town to provide additional green space between the two schools including a shade structure to provide breaks from the sun.

As we are completely a volunteer organization, we rely heavily on our community to support our league. This includes coaching, donation of time, equipment, and funding.

We are reaching out to you to ask you to become a financial sponsor, to help continue to meet the growing needs of our organization, including umpires, equipment, field maintenance, uniforms, and scholarship assistance for kids in need. We have worked hard to grow our program and make it accessible to all socio-economic backgrounds in our amazing city, and we depend on donations to support players in need.

As you read through the next page of sponsorship opportunities, please consider becoming a sponsor of FGFS for the 2019 season.

If you have any questions, please do not hesitate to contact me!

Thank you,

Greg Palmer
