

FILTER, MONITOR, AND REPORT EVERY DEVICE – ALL IN THE CLOUD

You're going 1:1, adding a variety of devices in the classroom to power learning. Now, you need to make sure it's paying off. With Relay, you get the insights you need to understand and maximize the use of those devices, keep users safe and increase the educational return on your technology investments. Relay has everything you need to make decisions to enhance technology use, report up to administrators, present to the board, reassure concerned parents, empower teachers, and direct students on appropriate use. Plus, Relay powers learning on any device, any OS and takes minutes to get started.

Report

Track usage and activity to ensure devices are used appropriately and effectively.

Filter

Manage web access, YouTube, and social media to keep students safe and on track.

Protect

Stop inappropriate behavior by identifying and remediating high-risk web activities.

Locate

Find lost or stolen devices with smart geolocation tools to keep your ROI high.
