

Recommended Dental Texts

MLA Dental Section Booklist – 2017

This list contains the revised, final core list of book and journal titles recommended for acquisition by the Dental Section of the Medical Library Association for support of clinical dentistry. Contributors to this project are: Susan Arnold, Elisa Cortez, Irene Lubker, Richard McGowan, Dorothy Ogdon, Nena Schvaneveldt, Elizabeth Stellrecht, Susan Swogger, Dana Thimons, and Maria Zych.

The list is an update of the Dental Section’s “A basic list of recommended books and journals for support of clinical dentistry in a nondental library” (Bull Med Libr Assoc 1997;85(3):233-38). The list was amended in 2003 by Frank Mason (chair), John Glueckert and Luis Gonzalez, and again in 2009 by Annie Hughes.

MLA Dental Section Booklist for a Library Supporting a Dental Program or Dental Service

The following are book titles recommended by dental librarians for a core resource dental collection. This core collection is to support the information and research needs of the oral health care provider (student and practitioner). This collection can be a part of a larger health sciences library or a part of a separate dental library, or housed in a hospital or departmental library. This list also includes titles used to compile the National Dental Board Exam. The section is responsible for updating this list every three to four years.

It is up to the discretion of the individual library to determine when to weed and assess if a title in the collection still has value, as well as which format of a title is preferred.

The selection criteria are:

- Current English-language title still in-print and available, unless the title has historical significance (i.e. deemed a “classic work”).
- Established, authoritative author(s) and publisher.
- Meets the information and/or research needs on the subject for the oral health care provider (student and practitioner)
- First purchase titles must meet at least one of the following criteria:
 - Appears on Doody’s Core Title list.
 - The title is used to create questions on the National Dental Board Exam.
 - There has been several updates and editions of the title.
- May have been used as a recommended or required textbook for the subject in a teaching environment in the US and/or Canada (recommended criterion but not required)

- (*) before a title is a recommended first purchase title.
- (+) is a title that is used to create the National Dental Board Exam
- (§) indicates that a title is available electronically.

Subjects

AIDS & HIV	Esthetics, Dental	Oral Radiology
Anatomy, Histology & Embryology	Forensic Dentistry	Oral Surgery
Anesthesiology	Geriatric Dentistry	Orthodontics
Cleft Palate	Human Engineering	Patient Care Planning
Communicable Disease Control	Mouth Neoplasms	Pediatric Dentistry
Critical Care & Emergencies	Nutrition	Periodontics
Dental Caries	Operative Dentistry	Pharmacology & Therapeutics
Dental Implants	Oral Diagnosis	Prosthodontics
Dental Materials	Oral Medicine	Temporomandibular Joint Diseases
Dental Public Health	Oral Microbiology	Reference
Endodontics	Oral Pathology	Journals
