Recommended Dental Texts - 2022

Foreword

This list contains the revised, final core list of book and journal titles recommended for acquisition by the Dental Caucus of the Medical Library Association for support of clinical dentistry. Contributors to the 2022 project are: Susan Arnold, Rachel Becker, Hal Bright, Natalie Clairoux, Bradrick McClam, Lorraine Porcello and Sean Stone.

The list is an update of “A basic list of recommended books and journals for support of clinical dentistry in a non-dental library” (Bull Med Libr Assoc 1997;85(3):233-38). The list was amended in 2003 by Frank Mason, John Glueckert and Luis Gonzalez, and again in 2009 by Annie Hughes. Contributors to the 2017 update were: Susan Arnold, Elisa Cortez, Irene Lubker, Richard McGowan, Dorothy Ogdon, Nena Schvaneveldt, Elizabeth Stellrecht, Susan Swogger, Dana Thimons, and Maria Zych. The Caucus is responsible for updating this list regularly.

MLA Dental Caucus Booklist for a Library Supporting a Dental Program or Dental Service

The following are book titles recommended by dental librarians for a core resource dental collection. This core collection is to support the information and research needs of the oral health care provider (student and practitioner). This collection can be a part of a larger health sciences library, or a part of a separate dental library, or housed in a hospital or departmental library.

It is up to the discretion of the individual library to determine when to weed and assess if a title in the collection still has value, as well as which format of a title is preferred.

The selection criteria are:

- Current English-language title still in-print and available, unless the title has historical significance (i.e. deemed a “classic work”).
- Established, authoritative author(s) and publisher.
- Meets the information and/or research needs on the subject for the oral health care provider (student and practitioner).
- First purchase titles (*) must meet at least one of the following criteria:
  - Appears on Doody’s Core Title list. These titles are identified with (Δ).
The title is used to create questions on the Integrated National Dental Board Exam. These titles are identified with (+).

- There have been several updates and editions of the title.

- May have been used as a recommended or required textbook for the subject in a teaching environment in the US and/or Canada (recommended criterion but not required).
