

Use NEJM.org for teaching and learning

VIDEOS IN CLINICAL MEDICINE demonstrate common clinical procedures. Viewable at NEJM.org, these videos are peer-reviewed for accuracy and chaptered for easy reference. They provide a concise review of the procedure, including preparation, equipment, and more.

Weekly **QUICK TAKE** videos present highlights of important articles in an engaging, animated format. These brief videos offer a succinct, innovated way to understand important new research findings that have an impact on medical practice and patient care.

Twice each week, NEJM publishes images that are typically striking examples of a common clinical presentation along with accompanying text. **IMAGES IN CLINICAL MEDICINE** help physicians-in-training recognize common conditions and make more timely, accurate diagnoses.

The **IMAGE CHALLENGE** presents an acclaimed NEJM medical image and asks the viewer to make a diagnosis or answer a question. Answers can be submitted for immediate feedback, and each Image Challenge includes links to supporting articles.

With **INTERACTIVE MEDICAL CASES**, users virtually manage an actual peer-reviewed case. View videos, lab results, and brief commentary that explain important concepts.

The **CASE CHALLENGE** feature provides the case description from an upcoming Case Record of the MGH — but without the diagnosis. Users vote on the patient's diagnosis and choose which diagnostic test(s) to order. The correct diagnosis and a full description of the case are published soon after.

CLINICAL PROBLEM-SOLVING follows top clinicians as they are presented with data in stages to simulate a clinical setting. They make recommendations and decisions based on the information provided, and share their reasoning.

CASE RECORDS OF THE MGH

describes the treatment of an actual case, offering insights into the expert physicians' medical decision-making, differential diagnosis, and progressive workup of symptoms and treatment options.

POWERPOINT SLIDE SETS make it easy to present NEJM articles, figures, and tables. Slide Sets include a summary of key points, along with all visuals and citations. You can also download **POWERPOINT IMAGES**. Access any image, illustration, or table from NEJM as a PowerPoint slide with a single click. Each slide includes the title and citation information, and the caption for the image is automatically added to the Notes section of your PowerPoint presentation.

The **CLINICAL AND RESIDENT BRIEFING** is a weekly email with summaries of two current articles that are particularly valuable for teaching. Clinical Pearls and Morning Report Questions help teachers and residents focus on an article's topics. Links are provided to full-text, PDFs, PowerPoint Slides and Slide Sets, and videos.
