Utilizing the finger openings in the cover, pink the cover to bend cover to remove from the splice tray.

Note: Utilization of the full loop requires the use of at least 2 meter pigtails.

*Note: Splice sleeve shown represents 60mm

Approximate length of loop (splice point to tie down): 30 inches

Approximate length of loop (splice point to tie down): 16 inches
To reinstall the splice tray cover, ensure that all fiber is routed correctly under the retention features to avoid damaging. 1. Insert one side under retention tabs as shown. 2. Bend the cover with the finger hole to insert the other side under the other retention tabs.
The trays will interlock with the tray below utilizing the post and socket features in the trays.

Trays can be stacked to match enclosure fiber capacity.

The provided administrative label can be attached to the tray covers if desired.

To assist safe installations, comply with the following:
