Siemon's adjustable-depth, 4-Post Rack provides a stable platform for mounting extended depth/size active equipment. It is ideal for use in both Telecommunications Rooms and central patching areas within Data Center environments.

In addition to providing compatibility with Siemon's standalone vertical cable managers, the 4-Post Rack can be used with a wide range of accessories including Zero-U panels which allow for mounting of patch panels, PDU's or cable management between bayed racks or at end of rows.

The headers, vertical rails and depth adjustment brackets all feature symmetrical designs to eliminate orientation errors during assembly. They also work in conjunction to self-square the rack during assembly saving valuable installation time. The result is a rack that can be field assembled in less than 20 minutes.
Product Information

Siemon 4-Post Rack System

<table>
<thead>
<tr>
<th>Part Number</th>

</tr>
<tr>
<td>VPA-PDU-S2-1</td>
<td>4-Post Rack side facing PDU bracket – Supports two PDUs side by side</td>
</tr>
<tr>
<td>RSQ-BAY-VPP</td>
<td>4-Post Rack baying bracket for Zero-U Panels, set of 4</td>
</tr>
</tbody>
</table>

* Includes bag of 50 M6 cage nuts
** Zero-U baying brackets are required to ensure proper operation of Zero-U panels.

Notes:
1. The use of Siemon’s RouteIT vertical cable managers is recommended as the rear access functionality of Siemon’s vertical patching channels can be compromised when installed between 4-Post Racks.

4-Post Rack Specifications

- **U Space**: 45U Note: 1U = 44.5mm (1.75 in.)
- **Color**: Black
- **Packaging**: Ships assembled in a single carton
- **Compliance**: CEA-310-E, UL 60950, IEC 60297-3-100, RoHS
- **Weight**: 48 kgs (105 lbs), Full weight with packaging
- **Load Rating**: 907 kgs (2000 lbs) Static load, evenly distributed

Because we continuously improve our products, Siemon reserves the right to change specifications and availability without prior notice.
