DIN Rail Mounted Patch Panels

DIN Rail Mounted Patch Panels provide an effective solution for industrial networks inside control panels and distribution cabinets where DIN mounted equipment is used. The modular design accommodates copper, fiber and multi-media modules to support most applications. The low-profile angled design minimizes cable bend radius in shallow enclosures where space is a premium and can be side stackable to grow with your networking changes.

The shielded version offers a solution when the panel needs to be grounded in applications where copper meets fiber cabling. It accommodates any shielded Category 5e, 6, 6A, 7 or 8 twisted pair copper, connecting permanent cable to patch cords.

APPLICATIONS
- Inside equipment cabinets with DIN rails
- Alongside Industrial Ethernet switches and PLC's

STANDARDS COMPLIANCE
- European Standard EN 50022
- IEC International Standard 60715

Product Accessories

Z-MAX® Outlets
Z-MAX copper outlets, available in Category 5e and 6A Shielded and Cat 6 and 6A UTP versions, feature unparalleled performance and the fastest termination in the industry.

Quick-Pack® Adapter Plates
Quick-Pack adapter plates offer an integrated latch, providing single-finger access to fiber in fully populated enclosures. Available in LC and SC fiber versions.

Because we continuously improve our products, Siemon reserves the right to change specifications and availability without prior notice.
