The Fiber Splitter Panel uses advanced PLC (Planar Lightwave Circuit) technology to enable multiple fiber connections with superior optical performance. This method uses splitter devices fabricated with silica optical waveguide elements which results in low insertion loss, high uniformity, and low polarization dependent loss (PDL). The Fiber Splitter Panel is a 19 inch rack mount unit with SC ports in either UPC or APC versions. It is available in various port configurations ranging from 1 or 2 inputs and 8 to 32 output ports.

The Fiber Splitter Panel is ideal for Passive Optical LAN’s and other singlemode applications requiring high performance splitting of optical signals. Siemon offers a complete range of fiber cables and connectivity, including preterminated MTP solutions, to complete an entire passive optical channel.

**APPLICATIONS**
- Passive Optical LAN (POL) systems
- PON / FTTX Networks
- CATV
- DWDM and CWDM systems

**FIBER CONNECTIVITY, ENCLOSURES AND CABLE**

- **1X Splitters:** Traditional splitters with a single input and multiple outputs
- **Dual Splitters:** Packages two 1X splitters in a single cassette. There are two inputs for these splitters and each input connects to different output ports. There is no connection between the two splitters.
- **2X Splitters:** These splitters provide two inputs and multiple outputs but, unlike a dual splitter, both inputs connect to all outputs provided that both inputs are not transmitting at the same time. These splitters allow redundancy by having two inputs feed all available outputs.
PRODUCT INFORMATION

Ordering Information:

FSR-XXX(XXX)(XXX)(XXX) . . . . . . . . . . . . . . . . . Fiber Splitter Panel, 1U, black

I/O Ratio
108 = 1 x 8
116 = 1 x 16
132 = 1 x 32
208 = 2 x 8
216 = 2 x 16
216 = 2 x 16
216 = 2 x 16
232 = 2 x 32

* Input and output connector must be the same type.
