Siemon’s category 5e BladePatch patch cords offer a unique solution for high-density patching environments. They feature an innovative push-pull boot design to control the latch, enabling easy access and removal of the cord in tight-fitting areas. The BladePatch cords are ideal for patching blade servers, patch panels, or any equipment with high density RJ-45 outlets.

- **Snagless**: Push-pull latch design eliminates external thumb latch on standard modular plug designs which can snag and break.

- **Low Profile Boot Design**: Optimizes side-stackability of patch cords and allows use in even the most dense equipment.

- **Universal Wiring**: Compatible with T568A/B wiring schemes.

- **Revolutionary Design**: Patented push-pull latch design eliminates need to defeat thumb latch used in standard modular plug designs. Enables easy access and removal in high density patching environments.

- **Universal Compatibility**: Fits within any standard RJ-45 outlet.

- **Revolutionary Latch**: Simply push the boot forward to latch into the outlet and pull back to release.

- **High Density**: The push-pull design enables easy access and removal via the boot in tight-fitting areas.
