SkinnyPatch® 6 UTP Modular Cords

Regional Availability - North America

Siemon's SkinnyPatch 6 Modular Cords deliver category 6 performance with a reduced cable diameter for improved airflow and increased flexibility in high-density patching areas. The cord's smaller 28 AWG stranded copper construction offers a significantly tighter bend radius for easier cable routing and enhanced cable management, providing pathway space savings in racks and cabinets while facilitating moves, adds and changes in tight spaces. Confirmed by Intertek, an independent third party test lab, SkinnyPatch 6 Modular Cords exceed ANSI/TIA-568.2-D and ISO/IEC 11801-1 Ed 1.0 performance standards. These cords also feature Siemon's patented metallic isolator for exceptional NEXT performance and innovative 360-degree crimp for excellent plug-to-cable strain relief.

Color Coding
Optional colored clips enable field color coding and can be easily snapped into place without having to disconnect cords.

Excellent Bend Relief
Boot and integrated strain relief ensures minimum bend radius for category 6 performance

Improved Airflow
Offers improved airflow, accessibility and cable management in high-density applications.

Diameter
Smaller diameter cable significantly reduces bundle and pathway fill for space savings.
