

Objective of the CHOA Landscape Committee, 2010
(updated 2018)

Our objective is to ensure that the public areas of the Chimney Hill community are carefully maintained and, as necessary and feasible, enhanced by shrubs, trees, and colorful plantings, pleasant to the eye, and an invaluable contribution toward the increase in property values.

In order to meet this objective, we must:

- ❖ Meet regularly to discuss and address Committee members' and CHOA members' specific concerns;
- ❖ Oversee the work of the contracted CHOA Gardener and provide input; assist the Gardener when feasible to save on costs;
- ❖ Provide education to the Chimney Hill community on
 - a) How to plant and maintain attractive properties;
 - b) Appreciation of the wildlife and vegetation on our lands by presenting workshops and nature-oriented events;
 - c) Update our website with pertinent articles and reference works; contribute comments and advice to the e-newsletter
