

# Utility & Property Information

**Address:** 4166 Mines Rd, Lowell, VT 05847. \*For GPS purposes only. 911 address to be assigned by town if/when a dwelling is constructed on the property.

From Route 100 in Eden nearby the Eden Lake, turn onto N. Road. N. Road becomes Mines Road. Access road into the property after the discontinued mine on your left. See real estate sign.

**Taxes:** Town of Lowell— \$3,520.48 (2025 Non-Homestead Value). Property is NOT enrolled in Vermont's tax reduction program (Use Value Appraisal) or commonly referred to as Current Use. The UVA program allows for substantial property tax reduction in exchange for the practice of good silviculture and a commitment to non-development uses.

**Zoning:** Conservation-Mountain & Rural Residential-Ag Zoning Districts.

The current zoning map depicts a portion of the property in Industrial zoning, however, the town has verbally indicated that, when drawing zoning district lines, their intention was to only put the Asbestos Mine property within the Industrial Zoning District. Buyers and Agents please conduct your own due diligence on this matter.

Access the [Lowell Zoning Bylaws](#) for further information. The Lowell Zoning Administrator may also be contacted at 802-744-6559 with any additional questions.

**Acreage:** There is a discrepancy in the acreage of the property. Per the town records, the property is listed as consisting of 335 acres and is taxed as such. The deed for the property indicates that the property consists of 350 acres more or less. Per a survey of the property completed in 2018, the property consists of 372.6 +/- acres. For marketing purposes, we have used the surveyed acreage of the property. It's likely that the total surveyed acreage will be reduced by roughly a couple acres due to the 2026 right of way court ruling. The road frontage has been discovered to be owned by the mine property and there is now legal deeded row access over it benefiting this property.

**Access Road/**

**ROW:** The property enjoys an access road off Mines Road that leads to a mostly

level log landing. The access road is easily traveled with a 4x4 or ATV or truck/high clearance SUV. There is a small section of ROW adjacent to the road frontage. Please see Quitclaim Deed of Easement in the attached documents.

**Power:** Vermont Electric Coop — residential utility pole #3G/59S is located along Mines Road approximately 1500' +/- away from the access road into the property. No formal estimate can be provided until power service application is submitted and a site visit has been conducted. For more information, please contact VEC at 802-635-2331.

**Septic/Water:** There is no formal septic system or water supply on the property. Per state regulations, purchasers will need to provide their own state approved Wastewater and Potable Water permit. Drilled artesian wells are typical for the area.

**Streams:** There are several year-round streams with lots of smaller axillary streams seemingly running year-round on the property.

**VASA Trail:** The Vermont ATV Sportsman's Association (VASA) club maintains a trail network throughout the state, and Mines Road is part of their trail network, which allows Recreational Off-Highway Vehicles (ROV) to be used.

## **Vermont**

**Asbestos Mine:** The property adjoins the Vermont Asbestos Group property, which includes a [discontinued asbestos mine](#).

In March 2026, Brave Little State produced a [podcast on the mine](#). For informational purposes only.

Per the survey, there appears to be some encroachment from the previous activity by the Vermont Asbestos Group with the surveyor noting approximate limits of an open quarry on the property along the far back southwesterly boundary and a tailings pile crossing the property boundary near the access road off Mines Road. Please see the survey included in *Supporting Documents & Maps* for reference.

**Conserved Land:** The property's northerly boundary adjoins lands owned by the State of Vermont and the Green Mountain Club, both of which include recreational hiking trails through the land. The Long Trail is located on land owned by the

Green Mountain Club and provides access to Belvidere Mountain located on the adjoining property. Please see the *Interactive Map* of the property for reference.

**Trails:** The property enjoys many old woods roads/logging trails that could be reclaimed for private recreational purposes on the property.

**Road:** Mines Road — Paved, Class II town plowed and maintained road.
