

Zimbra Chat

Free Peer-to-Peer Chat in Zimbra Collaboration 8.7.6 and Beyond

At A Glance

Zimbra Chat integrates an IM server and client into Zimbra, the world's most popular Open Source Collaboration platform. Now your business can harness peer-to-peer chat from within the communication tool they use the most — email. Your users can communicate within the Zimbra Web Client, and desktop and mobile users can connect via XMPP.

Zimbra Chat works out-of-the-box! Enable the Zimbra Chat Zimlet, and your users are ready to start chatting.

IM for Everyone!

Beginning in Zimbra 8.7.6, the fully integrated Zimbra Chat is included free in Zimbra Collaboration.

Buddylist Management

Invite and remove users from your buddylist at will, assign nicknames, send IM conversations via email and start chatting with a simple click.

Chat History

Every message and conversation is saved and accessible from the "Chats" folder in Zimbra.

Status Management

Switch between four status messages: Available, Away, Do Not Disturb or Invisible.

Hundreds of Emojis

Show your mood in chat with open source emojis, courtesy of EmojiOne.

User Preferences

Manage buddylists, notifications and inactivity settings from the chat panel in the Zimbra Web Client.
