

Zimbra Wins! Microsoft Exchange and Lotus Domino Dumped for Zimbra!

“Our analysis covered a lot of leading mail servers and Zimbra was the absolute winner,” said Dragoslav Vasiljevic, System & Network Engineer.

ArsBlue provides high-quality design, development and implementation of modern payment solutions based on payment cards, mobile and internet technologies. ArsBlue’s solutions can help reduce costs, maximize profitability, improve client relation management and eliminate fraud.

Opportunity

Replace Microsoft Exchange and Lotus Domino with a better, lower cost email platform.

ArsBlue used a combination of servers for their email: Microsoft Exchange and Lotus Domino. They wanted to replace these with one email collaboration platform that:

- Would save money
- Could run on-premises on a Linux system
- Could guarantee a seamless migration for users
- Would provide the privacy and security required for their financial data

Serbia

KEY BENEFITS

- Privacy and security
- Linux-based, on-prem platform
- Easy migration

“We had perfect communication with Zimbra during the implementation. First, we used trial licenses, and during that period we had perfect support from the Zimbra Team. We are especially pleased with the personal contact and good care we have received as a new client,” said Vasiljevic.

Solution

Migrate to Zimbra for happier users and email IT admins.

“We did a cost-benefit analysis of emails servers that met our criteria. Our analysis covered a lot of leading mail servers, and Zimbra was the absolute winner. After the trial period, the great feedback from our customers proved that we had the right solution for us,” said Dragoslav Vasiljevic, System & Network Engineer for ArsBlue..

ArsBlue opted for Zimbra Open Source Edition with Zimbra Suite Plus. Zimbra Suite Plus provides 4 Zimbra Next Gen modules: Mobile, HSM, Admin and Backup.

This combination of Zimbra products has resulted in highly satisfied users who are more productive than before.

And how was the migration experience from Microsoft Exchange and Lotus Domino to Zimbra? “Our experience with migrating was very positive. The migration passed very easily, without any problems. It was absolutely transparent for our users. Our employees are very satisfied with the Zimbra web client, and performance of our email system is better than before,” said Vasiljevic. ArsBlue did their on-premises install of Zimbra and migration completely in-house ... no outside help was required. It was that easy!

What’s Next?

Keep adding more features.

ArsBlue has integrated Zimbra with their Barracuda ESG solution for antis spam and antivirus controls. They plan to explore Zimlets and integrate them into their Zimbra platform to expand their existing functionality.
