

Zimbra Admin Plus

Admin Delegation and Domain Restriction

Zimbra Company Overview

More than 500 million people trust Zimbra to share what matters most — billions of meetings, messages and memories.

Zimbra provides a low-cost, customizable platform to securely exchange email messages, calendar appointments, contacts, files and task information from desktops, laptops and mobile devices.

Zimbra Suite Plus

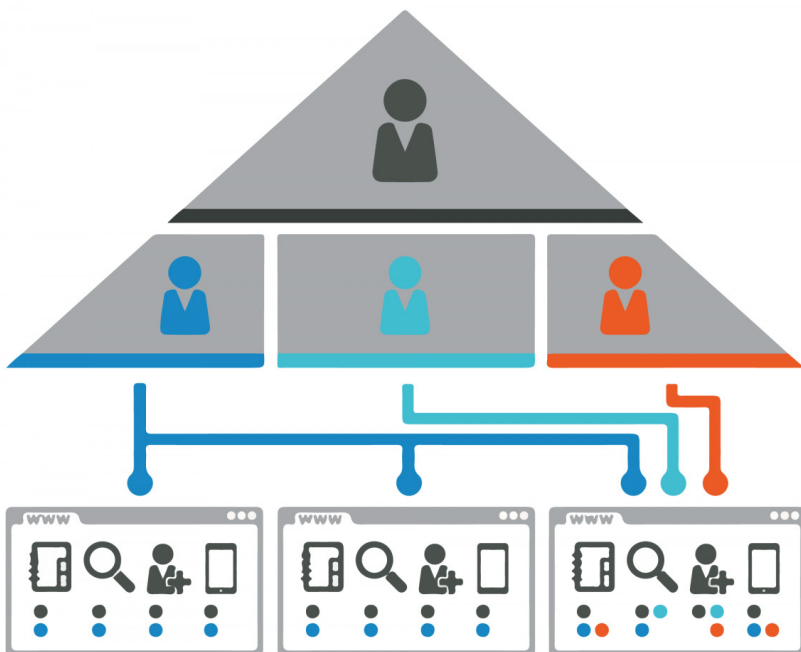

Highly Scalable and Perfect for Small and Large Infrastructures

Zimbra Admin Plus is available for purchase as a stand-alone module or as part of Zimbra Suite Plus. Zimbra Suite Plus is a modular add-on that allows you to extend your Zimbra Server's capabilities on Zimbra Open Source, such as real-time hot backup and restore or mobile push synchronization, with easily affordable options.

ZIMBRA ADMIN PLUS PROVIDES:

- **Admin Delegation**
- **Multi-tenancy**
- **Activity Logging**
- **Domain Control**
- **Disk Quota Limits**

Zimbra Admin Plus

Zimbra Admin Plus is your next step in Zimbra Administration.

Grant Delegated Admin rights to users on your server, so they can perform user management tasks such as setting quotas, modifying Class of Service (COS) variables and establishing user limits for your domains. This means you can gracefully handle one of the most delicate tasks of a system administrator: multi-tenancy.

Keep track of both your Delegated Admins' actions and your domain status with the reporting features of Zimbra Admin Plus, which is integrated with the Zimbra Administration Console via the Zimbra Suite Administration Zimlet.

Delegated Admins access the Zimbra Administration Console just like Global Admins, but Delegated Admins have a reduced scope that only allows them to see and interact with the elements their role allows.

Keep track of all admin activity with a built-in log search and browse tool. Data for both Delegated and Global Administrators can be queried and viewed straight from the Zimbra Suite Administration Zimlet.

Disk Quota Limits

Set per-domain user quota limits to protect yourself against lavish quota grants and storage space squandering, and better predict and plan your storage expansion policies.

Admin Delegation and Multi-Tenancy

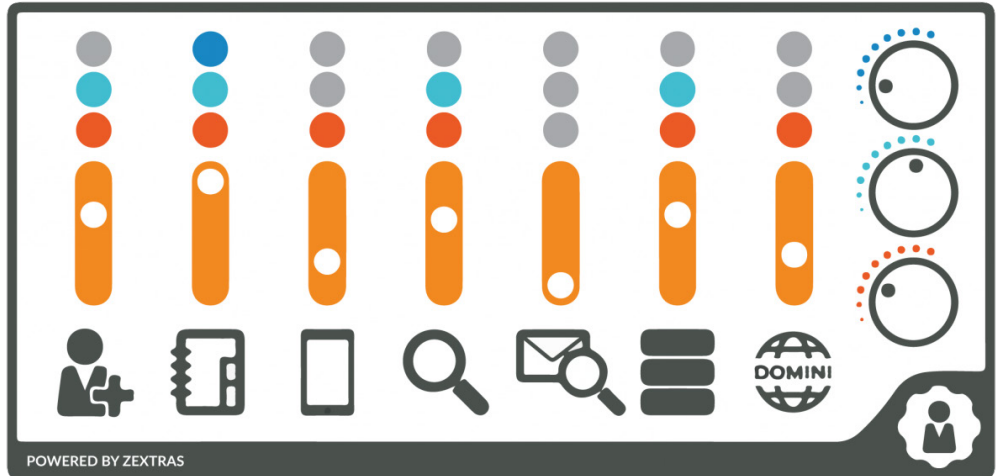

Grant delegated admin rights to one or more users, so they can perform user provisioning and management operations for one or more domains, thus relieving Global Administrators from such tasks.

Domain Control

Set COS, quota and user limits for domains to create impassable boundaries for your servers.

About Zimbra

Zimbra, a Synacor brand, connects people and information with unified collaboration software that includes email, calendaring, file sharing, chat and video chat. Zimbra is trusted by more than 5,000 companies and government customers, as well as by service providers who manage Zimbra in the cloud for more than 200,000 businesses. Zimbra is the largest provider of open source collaboration software in the world.

Zimbra Admin Plus Features

- **Monthly Report:** Automatically create a monthly report containing information about admin activity and domain status. This report is delivered either via email or briefcase.
- **No Configuration Needed:** No initial module configuration required, so you can create Delegated Admins and set domain limits out-of-the-box.
- **Inhibit the View Mail Feature:** To safeguard your users' privacy, selectively enable or disable the View Mail feature for your Delegated Admins.
- **Admin Setting Reset:** The Admin Configuration Reset restores any admin-related settings.
