

Zimbra Mobile Plus

**Synchronize Your Zimbra Mailbox
Anytime, Anywhere, on Any Device**

Zimbra Company Overview

More than 500 million people trust Zimbra to share what matters most — billions of meetings, messages and memories.

Zimbra provides a low-cost, customizable platform to securely exchange email messages, calendar appointments, contacts, files and task information from desktops, laptops and mobile devices.

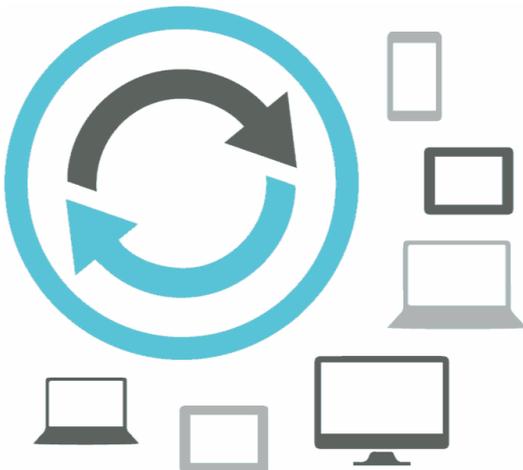

Zimbra Suite Plus

Highly Scalable and Perfect for Small and Large Infrastructures

Zimbra Mobile Plus is available for purchase as a stand-alone module or as part of Zimbra Suite Plus. Zimbra Suite Plus is a modular add-on that allows you to extend your Zimbra Server's capabilities on Zimbra Open Source, such as real-time hot backup and restore or mobile push synchronization, with easily affordable options.

Zimbra Mobile Plus

Zimbra Mobile Plus Features

Zimbra Mobile Plus allows your users to synchronize their Zimbra mailbox with their mobile devices through the widespread Exchange ActiveSync (EAS) protocol, natively supported by the vast majority of mobile devices.

Whether it is a mobile phone or a tablet, corporate or BYOD, your data will always be at your fingertips, without any middle-ware or dedicated client.

Zimbra Mobile Plus is not just a mere viewing medium. It is a complete communication solution that allows you to send and receive emails, use the Global Address List, fully manage contacts in your Zimbra address book, create appointments, arrange meetings and manage task lists.

Zimbra Mobile's Plus seamless integration with Zimbra allows for instant PUSH notifications, meaning that every new email, contact and appointment will be instantly synchronized.

ZIMBRA MOBILE PLUS:

Allows your users to synchronize their Zimbra mailbox with their mobile devices through the widespread Exchange ActiveSync protocol, natively supported by the vast majority of mobile devices.

Administrators can manage everything mobile-related straight from the Zimbra Administration Console thanks to the Zimbra Suite Administration Zimlet.

No Configuration Needed

You choose which users and/or Classes of Service (COS) can use the mobile synchronization features, and the module will handle the rest. Zimbra Mobile Plus runs on standard web ports, so you will not have to make any firewall/network config changes either.

Exchange ActiveSync Protocol

The widespread EAS protocol grants you the highest native compatibility ever. Synchronize your data with your iPhone, iPad, Android device, Nokia phone and Windows Mobile device without any client app.

Synchronization Control

Thanks to the Zimbra Suite Administration Zimlet, you will always be aware of the users and devices synchronizing with the server. You will also have options to reset a synchronization session and to delete the whole synchronization history for a device.

Fine Tuning Options

Zimbra Mobile Plus does not require any configuration to be operational. However, a set of fine tuning settings are available for those administrators who want to tweak their mobile experience on very large deployments.

Shared Folder Synchronization

Synchronize everything that has been shared with you in Zimbra to your device.

On the Go Meeting Invitation/Response

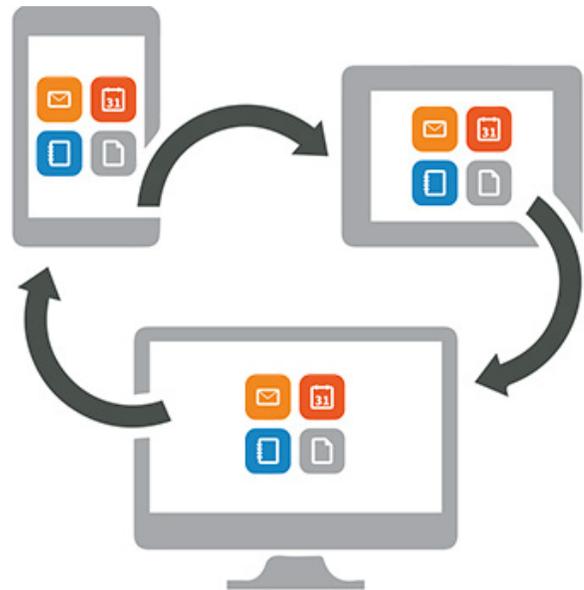

Planning meetings has never been so easy: create a new appointment on your mobile and add any participants you want. If you receive a meeting invitation by email, you can accept or decline the request right on your device.

Dedicated Logging

Zimbra Mobile Plus writes to a dedicated log file, which can prove invaluable for keeping track of your synchronization activities. The Account Logger feature also allows you to easily configure a separate log file for a device/user to make troubleshooting easier.

Push Sync of All Items

Each new item and change to existing items are instantly synchronized between your Zimbra mailbox and your device. This applies to email, contacts, appointments and tasks.

Mobile Device Management

Zimbra Mobile Plus allows Global Admins to perform remote provisioning operations, such as resetting a device to factory defaults, in case of theft or to force the use of an unlock code for higher security.

About Zimbra

Zimbra, a Synacor brand, connects people and information with unified collaboration software that includes email, calendaring, file sharing, chat and video chat. Zimbra is trusted by more than 5,000 companies and government customers, as well as by service providers who manage Zimbra in the cloud for more than 200,000 businesses. Zimbra is the largest provider of open source collaboration software in the world.
