

# REACHING FOR HIGHER GOALS WITH SYNCFUSION

*“Syncfusion provides us with strong, solid, and safe tools capable of saving us hundreds of hours in development.”*

**MARCO AURELIO RIBEIRO,**  
Owner and Architect, Hugedata

## BENEFITS

Saved hundreds of development hours

Helped create state-of-the-art interfaces

Affordable solutions

## CHALLENGE & SOLUTIONS

Before finding Syncfusion, small tech company Hugedata had lofty goals and struggled to stretch their budget to meet them. Hugedata aims to provide first-class software and database solutions for financial markets at affordable prices. However, they were having trouble creating state-of-the-art interfaces and quickly deploying solutions using recent advances in coding tech without resorting to expensive resources. Using Office products to manipulate files was also a problem.

After working with Syncfusion, the distance between Hugedata and their goals became a lot smaller. “Syncfusion provides us with strong, solid, and safe tools capable of saving us hundreds of hours in development, considering our very small size, ambitious targets, and the market demand,” said Marco Aurelio Ribeiro, Hugedata’s owner.

Hugedata uses Syncfusion’s [controls](#) and [file-format libraries](#) to bridge the distance to their goals, and continues to aim higher. They plan to deploy to Azure soon, and have declared their intention to one day become one of Syncfusion’s largest clients. Syncfusion hopes so, too!
