REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We have reviewed the accompanying balance sheet of WorldTradeShow, Inc. as of October 31, 2006, and the related statements of operations, changes in stockholders' equity (deficit), and cash flows for the three months then ended. These financial statements are the representation of the management of WorldTradeShow, Inc.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. Because of the Company's current status and limited operations there is substantial doubt about its ability to continue as a going concern. Management's plans in regard to its current status are also described in Note 11. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

As of October 31, 2006, the Company has a federal net operating loss carry forwards of \$6,123,234 that can be utilized to reduce future taxable income. The net operating loss carry forward will expire at various dates beginning 2011 through 2018 if not utilized. Utilization of the net operating loss and tax credit carry forward may be subject to substantial annual limitations due to the ownership change limitations provided by the Internal Revenue Code of 1986, as amended, and similar state provisions. The annual limitation may result in the expiration of net operating loss and tax credit carry forwards before utilization. The Company has provided a full valuation allowance on the deferred tax asset because of uncertainty regarding realizability.

5. MAJOR CUSTOMER AND SEGMENT INFORMATION

The Company currently operates solely in one industry segment: the marketing and support of its hotel reservations system in Vietnam. No one customer accounted for approximately 5% of gross revenues for the period ending July 31, 2006. The Company has no operations or assets located outside of the United States. The Company's commissions revenue is concentrated in the Vietnam Hotel reservations system, creating a risk of concentration associated with the sale of a single product and limited customer base. The loss of this single market could cause severe damage to the Company's financial future.

The Company is not pursuing any other agreements regarding Voice Telecommunications over the Internet

8. BASIC AND FULLY DILUTED LOSS PER COMMON SHARE:

Effective November 30, 1998, the Company adopted the provisions of Statement of Financial Accounting Standards No. 128, Earnings per Share ("SFAS 128") which replaced the presentation of "primary" and "fully-diluted" earnings (loss) per common share required under previously promulgated accounting standards with the presentation of "basic" and "diluted" earnings (loss) per common share. Basic earnings (loss) per common share is calculated by dividing net income or loss by the weighted average number of common shares outstanding during the period. The calculation of diluted earnings (loss) per common share is similar to that of basic earnings (loss) per common share, except that the numerator and denominator are adjusted to reflect the decrease in earnings per share or the increase in loss per share that could occur if securities or other contracts to issue common stock, such as stock options and convertible notes, were exercised or converted into common stock.

9. STOCK OPTIONS

On June 30, 2000, the Company issued 1,350,000 options to certain officers. The options have an exercise price of \$0.10 per share, vest over a three-year period, beginning July 1, 2000 and expire one year after becoming exercisable. As of April 30, 2005, no options had yet been exercised. As the consulting agreements provided for the options to be exercised at below the Company's market price on the date of grant, the Company recorded additional consulting fees relating to estimated value of these options of \$140,630. These options were subsequently cancelled and new options issued.

The fair value of these options was estimated at the date of grant using the Black-Scholes option-pricing model for the fiscal year ended April 30, 2001; dividend yield of 0%; expected volatility of 250%; risk-free interest rate of 6.5%; and expected life of 3 years.

On June 30, 2003, the Company issued 900,000 options to certain officers. The options have an exercise price of \$0.30 per share (estimated market price at date of grant), vest over a three-year period, beginning June 30, 2003 and expire one year after becoming exercisable. As of the date of this report, 750,000 options have expired or were forfeited and no options had yet been exercised.

In September 2004, the Company issued 200,000 options to a consultant. The options have an exercise price of \$0.75 per share, vest over a one-year period, beginning in September 2004 and expire one year after becoming exercisable. As of the date of this report, no options had yet been exercised. As the consulting agreement provided for the options to be purchased at below the Company's market price on the date of grant, the Company recorded deferred compensation relating to these options of \$39,300 during the second quarter of fiscal 2005 as the company believes the options will not be exercised.

The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options, which have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions including the expected stock price volatility. Because the Company's employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models do not necessarily provide a reliable single measure of the fair value of its stock options.

A summary of stock option activity for all plans follows:

	Options	
<u>Outstanding Options</u>	<u>Outstanding</u>	<u>Exercise Price</u>
Authorized	-	-
Granted	2,450,000	\$0.75-\$0.30

Canceled	(2,100,000)	\$0.30
Balance, July 31, 2006	350,000	\$0.75-\$0.30

Following is a summary of the status of fixed options outstanding at April 30, 2006:

<u>Outstanding Options</u>			<u>Exercisable Options</u>		
<u>Exercise Price</u>	<u>Weighted</u>	<u>Weighted</u>	<u>Number</u>	<u>Weighted</u>	<u>Weighted</u>
<u>Range</u>	<u>Average</u>	<u>Average</u>	<u>Exercisable</u>	<u>Average</u>	<u>Exercise</u>

\$0.75	100,000	2 years	0.75	100,000	.75

Had compensation cost for the Company's stock-based compensation plan been determined based on the fair value at grant dates for awards under those plans consistent with the method described in SFAS 123, the Company's net loss would have been as follows:

	Period Ended July 31,	
	2006	2005
Net Loss:

10. CONTINGENCIES

In the opinion of management, there are no matters requiring recognition or disclosure as a loss contingency in accordance with Statement of Financial Standards No. 5, *Accounting for Contingencies*.

11. GOING CONCERN

To date the Company has had limited sales due to the early stage of its efforts to transition into the marketing of its internet resources. Consequently, the Company has incurred recurring losses from operations. These factors, as well as the risks associated with raising capital through the issuance of equity and/or debt securities creates uncertainty as to the Company's ability to continue as a going concern.

The Company's plans to address its going concern issues include:

- * Increasing sales of its products through national distribution channels and through direct marketing to consumers;
- * Raising capital through the sale of debt and/or equity securities; and,
- * Settling outstanding debts and accounts payable, when available, through the issuance of debt and/or equity securities.

There can be no assurance that the Company will be successful in its efforts to increase sales, issue debt and/or equity securities for cash or as payment for outstanding obligations.

The Company is in various stages of finalizing implementation strategies on a number of products and is actively attempting to market its products nationally in Vietnam. As a result of capital constraints it is uncertain when it will be able to start its websites to utilize the available licenses.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND PLAN OF OPERATIONS

The following discussion should be read in conjunction with our consolidated financial statements, and the related notes included elsewhere in this Quarterly Report on Form 10-QSB and the Annual Report on Form 10-KSB for the fiscal year ended April 30, 2006. Certain statements contained herein may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements involve a number of risks, uncertainties and other factors that could cause actual results to differ materially, as discussed more fully herein.

- 14 -

THIS REPORT ON FORM 10-QSB CONTAINS FORWARD-LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. THE COMPANY'S ACTUAL RESULTS MAY DIFFER SIGNIFICANTLY FROM THE RESULTS DISCUSSED IN SUCH FORWARD-LOOKING STATEMENTS.

OVERVIEW

The Company's operating results have fluctuated in the past and may in the future fluctuate significantly, depending upon a variety of factors, including the timely deployment and expansion of new network, the incurrence of related capital costs, variability and length of the sales cycle associated with the Company's product and service offerings, the receipt of new value-added network services and consumer services subscriptions and the introduction of new services by WTS and its competitors.

Additional factors that may contribute to variability of operating results include but are not limited to: the pricing and mix of services offered by the Company; customer retention rate; market acceptance of new and enhanced versions of the Company's services; changes in pricing policies by the Company's competitors; the Company's ability to obtain sufficient supplies of sole or limited-source components; user demand for services; the ability to manage potential growth and expansion; the ability to identify, acquire and integrate successfully suitable acquisition candidates; and charges related to acquisitions. In response to competitive pressures, the Company may take certain pricing or marketing actions that could have a material adverse effect on the Company's business. In the event that the Company's operating results in any future period fall below the expectations of securities analysts and investors, the trading price of the Company's common stock would likely decline.

PLAN OF OPERATION

We have a development strategy for the implementation of Phase I of the plan, which will require \$1,350,000 to complete. We have historically financed our operations through working capital provided by loans from management and our major vendor and controlling shareholder, Hi-Tek.com, Inc.. For the time being the Company anticipates that current operations will continue to be funded by shareholder loans or debt from our vendor and majority shareholder, Hi-Tek, until revenue from operations can sustain the cash flow requirements of the Company. For 2006 we have a commitment from our majority shareholders to fund our operations for that calendar year. Additionally, we may pursue additional private placement financing through close associates or friends and family members of management and our controlling shareholders. There can be no assurances that additional capital will be available on terms favorable to us or at all, or that we will be able to generate sufficient cash flow in order to sustain operations. To the extent that additional capital is raised through the sale of additional equity or debt securities, the issuance of such securities could result in additional dilution to our stockholders. In the event that we experience the need for additional capital, and are not able to generate capital from financing sources or from future operations, management may be required to modify, suspend or discontinue our operations and business plan.

The funds to complete Phase I, are projected by management to be used as follows: online and offline marketing programs, marketing Hotels.com.vn, utilizing the reservation software and completing online tradeshow software. The Company plans to obtain the necessary joint ventures, licenses, alliances and affiliates to market the web portal. WTS plans to hire sales and marketing staff in Vietnam and Mexico to complete agreements already in place. The Company also plans on hiring people, obtaining more agreements and alliances in Vietnam and Mexico.

November 2006-January 2006

WTS plans on pushing sales and marketing in Vietnam for Hotels.com.vn. The marketing has begun through search engines such as Google and

Yahoo. Hotels.com.vn is beginning to work with tour companies in Vietnam and working out alliance and affiliate programs to start to promote tour packages. The selling of a tour package will give multiple reservations with groups of people reserving rooms thus boosting the revenues for Hotels.com.vn

- 15 -

WTS and Hotels.com.vn are continuing to sign up 1 and 2 star hotels in Vietnam under 3 year contracts. The majority of hotels in the Vietnam are 1 and 2 star hotels, totaling approximately 3,000. Within the 64 provinces of Vietnam there are many hotels that are not 3, 4, or 5 stars, and the majority of these Hotels do not have websites. WTS and Hotels.com.vn supply these hotels with template websites so they can accept reservations online through the reservation engine. WTS projects that it will need additional sales and marketing staff as well as more customer care employees in Vietnam.

Currently, the Company has contracts with over 258 hotels in Vietnam, an increase of approximately 60, and we have contracted with over 90% of the 3-5 star hotels in Vietnam. The 2 star hotel signing is ongoing. Hotels.com.vn has been featured on Vietnamese television during a news television program, and has received an award from the Ministry of Trade in Vietnam. Hotels.com.vn was awarded the number one e-commerce travel tourism website and was ranked 13th overall in the Country of Vietnam. We expect to penetrate the hotel market with further funding for marketing in and out of Vietnam.

WTS has redesigned and launched the WorldTradeShow.com website. The new website has been redesigned to market specifically to Vietnam and Mexican tourism markets. Users are now able to make reservations for hotels in either country: via Hotels.com.vn for Vietnam, or MyBajaguide.com for Mexico. MyBajaGuide.com is slated to be launched in the spring of 2006. WTS has a Memorandum of Understanding (MOU) with MyBajaGuide.com for marketing their hotels, tours, restaurants, golf and businesses.

The license fees for 2004 and 2005 were payable by August 10, 2004 and February 10, 2005, respectively. In the prior year, WTS has negotiated to defer the first license fee payment until February 10, 2005. Subsequently, WTS negotiated with Business.com.vn to extend the contract for up to two years to February 10, 2007. In exchange for the rights licensed, WTS will earn a royalty equal to fifty (50%) percent of gross commission, as defined in the agreement (see exhibit 10.2). The extension document also provides that once WTS is trading on the OTC BB, Business.com.vn has the option for payment, or shares to be negotiated at that time.

Partnership with www.DotVN.com:

In May 2003, WTS announced a partnership with DotVN, the exclusive online Vietnamese domain registrar company. WTS receives a 15% commission on every .vn domain name sold through the WTS portal. WTS is working closely with DotVN to market and distribute these domains on its business web portal. Many global companies are doing business in Vietnam and many more want to participate. As Vietnam continues to grow economically, these businesses are positioning themselves to take advantage of the expansion. Those companies will have to acquire their Vietnamese Internet identity to brand their names, services and protect their trademarks. In addition, over 30,000 Vietnamese companies and the 80 million citizens of Vietnam will have the opportunity to register their choice of domain names. The .vn domain names have become un-restricted for worldwide registration, and it currently costs \$200 USD to register a .vn domain name per year. The www.VN affiliate program will allow WTS to generate revenue immediately from the registration of the .VN domain names.

EMPLOYEES

WTS currently has no employees, other than its officers and directors, who devote their time as required to its operations. In June 2000, WTS signed three consulting agreements with three different members of the Board of Directors. These agreements entitle each individual to a base salary ranging from \$7,500 to \$15,000 per month expired on January 30, 2001. Similar consulting agreements were extended for two of the individuals on an annual basis at terms similar to the original agreement through July 1, 2005. The other individual extended his agreement at terms similar to the original agreement through June 30, 2001. Each of the three individuals agreed not to withdraw a consulting fee until sufficient funding is secured. As of October 31, 2006 and April 30, 2006, WTS has unpaid consulting fees of approximately \$2,330,000 and \$2,330,000, respectively. One of the unpaid consulting fees bears interest at 12 percent. As of April 30, 2006 accrued interest on these unpaid fees was approximately \$392,000. These advances are not repayable until July 1, 2005 at which point WTS anticipates it will be able renegotiate the terms of the payments and all monies owed to the related parties. On August 1, 2005, the consulting agreements for Mr. Sheldon Silverman and Mr. Carlos Rosette were renewed. The term of Mr. Silverman's agreement commenced on August 1, 2005 and ends on July 31, 2006 and provides for compensation of \$15,000 per month for his services. The term of Mr. Rosette's agreement commenced on August 1, 2005 and ends on July 31, 2006, and provides for compensation of \$3,000 per month for his services.

GOING CONCERN

WTS has experienced recurring losses, has a working capital deficiency of \$4,169,530 and an accumulated deficit of \$5,945,786 as of April 30, 2006. These factors, among others raise substantial doubt as to its ability to continue as a going concern. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

FORWARD-LOOKING STATEMENTS AND ASSOCIATED RISKS RELATED TO AN INVESTMENT IN WORLDTRADESHOW.COM, INC. STOCK

- 21 -

Some of the statements in this report or incorporated by reference are forward-looking, including, without limitation, the statements under the caption "Management's Discussion and Analysis or Plan of Operation". Forward-looking statements include those that contain words like "may," "will," "could," "should," "project," "believe," "anticipate," "expect," "plan," "estimate," "forecast," "potential," "intend," "maintain," "continue" and variations of these words or comparable words. In addition, all of the non-historical information herein is forward-looking, including any statement or implication about a future time, result or other circumstance. Forward-looking statements are not a guarantee of future performance and involve risks and uncertainties. Actual results may differ substantially from the results that the forward-looking statements suggest for various reasons.

These forward-looking statements are made only as of the date of this report. We do not undertake to update or revise the forward-looking statements, whether as a result of new Information, future events or otherwise. (Note: The statutory safe harbors of the Private Securities Litigation Reform Act will not be available to us until such time as we become a reporting company)

The forward-looking statements included herein are based on, among other items, assumptions that we will be able to meet our operating cash and any debt service requirements, that we will be able to successfully resolve disputes and other business matters as anticipated, that competitive and technological conditions within the medical device and electronic component industries will not affect us materially or adversely, that we will retain key personnel, that our forecasts will reasonably anticipate market demand for our products, and that there will be no significant unanticipated cost increases or other material adverse change in our operations or business. Among the factors that could cause actual results to differ materially are the following:

- the impact of competitive products and their pricing;
- potential effects of inflation;
- lack of earnings visibility;
- dependence upon certain customers or markets;
- dependence upon suppliers;
- difficulties in integrating any acquired businesses and realizing cost savings or productivity gains;
- dependence on key personnel;
- difficulties regarding hiring and retaining qualified personnel in a competitive labor market; and
- Risks of doing business in international markets.

Other factors that could cause results to vary materially from current expectations are referred to elsewhere in this report.

Assumptions regarding the foregoing involve judgments that are difficult to make and future circumstances that are difficult to accurately predict. Forecasting and other management decisions are subjective in many respects and thus susceptible to interpretations and periodic revisions based on actual experience and business developments, the impact of which may cause us to alter our internal forecasts, and which may in turn affect expectations or future results. We do not undertake to publicly announce the changes that may occur in our expectations. Readers are cautioned against giving undue weight to any of the forward-looking statements. The inclusion of forward-looking information should not be regarded as a representation by us or any other person that our objectives or plans will be achieved. We are setting out some of the more specific risk factors below in full for the convenience of the readers:

The market price of our stock has fluctuated pursuant to the acquisition and our preparations for developing and marketing our products, and can be affected by economic and political uncertainties. Declines in the market price of our stock could adversely affect our ability to retain personnel with higher-priced stock incentives, to acquire businesses or assets in exchange for stock and/or to conduct future financing activities with the sale of stock.

WE NEED ADDITIONAL CAPITAL TO ACHIEVE OUR GOALS, BUT WE DO NOT HAVE ANY COMMITMENTS TO OBTAIN SUCH CAPITAL AND CAN NOT GIVE ASSURANCE THAT WE WILL BE ABLE TO OBTAIN CAPITAL AS AND WHEN REQUIRED.

- 22 -

FUTURE REVENUE GROWTH DEPENDS ON OUR ABILITY TO IMPROVE THE EFFECTIVENESS AND BREADTH OF OUR SALES ORGANIZATION.

WE MAY NOT BE ABLE TO PROTECT OUR PROPRIETARY RIGHTS AND MAY INCUR SIGNIFICANT COSTS ATTEMPTING TO DO SO. Our success and ability to compete are dependent to a significant degree on our proprietary technology. We rely on a combination of copyright, trade secret and trademark

THE MARKET FOR OUR COMMON STOCK IS LIMITED. Our common stock is thinly-traded and any recently reported sales price may not be a true market-based valuation of our common stock. There can be no assurance that an active market for our common stock will develop. In addition, the stock market in general has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to operating performance.

OUR COMMON STOCK IS CONSIDERED A "PENNY STOCK" AND, AS SUCH, THE MARKET FOR OUR COMMON STOCK MAY BE FURTHER LIMITED BY CERTAIN SEC RULES. As long as the price of our common stock remains below \$5.00 per share, the stock is likely to be subject to certain "penny stock" rules promulgated by the SEC. Those rules impose certain sales practice requirements on brokers who sell penny stock to persons other than established customers and accredited investors (generally institutions with assets in excess of \$5,000,000 or individuals with net worth in excess of \$1,000,000). For transactions covered by the penny stock rules, the broker must make a special suitability determination for the purchaser and receive the purchaser's written consent to the transaction prior to the sale. Furthermore, the penny stock rules generally require, among other things, that brokers engaged in secondary trading of penny stocks provide customers with written disclosure documents, monthly statements of the market value of penny stocks, disclosure of the bid and ask prices, disclosure of the compensation to the brokerage firm, and disclosure of the sales person working for the brokerage firm. These rules and regulations adversely affect the ability of brokers to sell our common stock and limit the liquidity of our securities.

THE TRADING PRICE OF OUR COMMON STOCK IS VOLATILE AND COULD DECLINE SUBSTANTIALLY. The trading price of our common stock is volatile and is likely to continue to be volatile. Our stock price could be subject to wide fluctuations in response to a variety of issues, including broad market factors that may have a material adverse impact on our stock price, regardless of our actual performance. The factors include, but are not limited to, the following:

- Periodic variations in the actual or anticipated financial results of our business or that of our competitors;
- Downward revisions in estimates of our future operating results or of the future operating results of our competitors;
- Material announcements by us or our competitors;
- Adverse changes in general market conditions or economic trends or in conditions or trends in the market in which we operate.

WE HAVE THE ABILITY TO ISSUE ADDITIONAL EQUITY SECURITIES, WHICH WOULD LEAD TO DILUTION OF OUR ISSUED AND OUTSTANDING COMMON STOCK. The issuance of additional equity securities or securities convertible into equity securities would result in dilution of our existing stockholders' equity interests in us. Our Board of Directors has the authority to issue, without vote or action of stockholders, preferred stock in one or more series, and has the ability to fix the rights, preferences, privileges and restrictions of any such series. Any such series of preferred stock could contain dividend rights, conversion rights, voting rights, terms of redemption, redemption prices, liquidation preferences or other rights superior to the rights of holders of our common stock. If we issue convertible preferred stock, a subsequent conversion may dilute the current common stockholders' interest. In addition, as of January 31, 2006, we were authorized to issue, without stockholder approval, up to 16,751,136 shares of common stock. Of that amount, 140,398 shares of our common stock were issuable upon the exercise of vested options.

- 23 -

WE DO NOT INTEND TO PAY CASH DIVIDENDS. AS A RESULT, STOCKHOLDERS WILL BENEFIT FROM AN INVESTMENT IN OUR COMMON STOCK ONLY IF IT APPRECIATES IN VALUE. We have never paid a cash dividend on our common stock, and we do not plan to pay any cash dividends on our common stock in the foreseeable future. We currently intend to retain any future earnings to finance our operations and further expansion and growth of our business, including acquisitions. As a result, the success of an investment in our common stock will depend upon any future appreciation in its value. We cannot guarantee that our common stock will appreciate in value or even maintain the price at which stockholders have purchased their shares.

(a) Disclosure Controls and Procedures

The Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), of the effectiveness of the Company's disclosure controls and procedures. Based upon that evaluation, the CEO and CFO concluded that as of July 31, 2006 our disclosure controls and procedures were effective in timely alerting them to the material information relating to the Company required to be included in the Company's periodic filings with the SEC, subject to the various limitations on effectiveness set forth below under the heading, "LIMITATIONS ON THE EFFECTIVENESS OF INTERNAL CONTROLS," such that the information relating to the Company, required to be disclosed in SEC reports (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to the Company's management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes in Internal Controls over financial reporting

Changes in internal control over financial reporting. There has been no change in the Company's internal control over financial reporting that occurred during the fiscal quarter ended July 31, 2006 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

(c) Limitations on Effectiveness of Disclosure Controls and Procedures

The Company's management, including the CEO and CFO, does not expect that our disclosure controls and procedures or our internal control over financial reporting will necessarily prevent all fraud and material error. An internal control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the internal control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, control may become inadequate because of changes in conditions, and/or the degree of compliance with the policies or procedures may deteriorate.
