Fitlet2 with 2 WLAN installation guide

- This guide is applicable for Fitlet2, configured with FC-PCI.
- It provides the installation instructions to add a 2nd WLAN module.
- Parts for installing this solution should be acquired from Compulab. Contact fitpcsales@compulab.co.il for more information
- For full instructions of the FC-PCI assembly with the fitlet2 please refer to the below link:
http://fit-pc.com/wiki/index.php/Fitlet2_FC-PCI_installation_instructions

1. Assemble the half size to full size extender plate with the mini PCIe adapted WiFi module using the 2x Phillips screws.
2. Mind the extender's orientation, consult the pictures.
3. After completed, cover the construction with one layer of Kapton tape.
4. Plug the adapter to the mini PCIe port at the back of the FC-PCI, and fasten with the 2x Phillips screws.
5. Plug the IPX to SMA short antenna cables to the WiFi module.
6. Plug the FC-PCI to the M.2 connectors
7. Fasten the FACET with the Phillips screw
8. Assemble the SMA plugs to the supplied side panel.
9. Make sure that the top WiFi module's SMA antenna cables are routed correctly. Consult the [FC-PCI installation guide](#)

10. Complete by bringing both side panels to their designated location and assemble bottom cover with 4x Phillips chassis screws
