Page 5 The software included in this section is very useful in the daily applications of your computer. It has been divided into several categories, including: Security (antivirus software and firewall, among others), System tools (improving Windows systems) and Audio & video (everything you need to play audio and video files on your PC). For gamers is a special category that contains mandatory software for players, such as GPU drivers, software emulation of video game consoles and clients for different digital distribution platforms (such as Steam, Uplay and Origin). In the category Software, you can find utility utilities available for free (not for commercial applications), which can improve the performance of your PC in many ways. The software includes codec packages, it is mandatory to play all types of movies, communicators, internet browsers, applications to open and/or edit sound files and video clips, data download managers etc. Of course, in the software tab there is also a program for gamers. That includes: driver packages, required to get most Radeon and GeForce GPUs, hardware platform emulators (computers and virtual consoles - new and old), applications that improve the performance of your PC in video games, tools for creating / modifying games, software to configure controllers (such as gamepads) etc. The software shared by our pages is primarily intended for personal computers running on Windows systems. There is a free full version (freeware), as well as a trial version (shareware). Page 6 Our download section is dedicated to helping you complete very hard games, or just unlock new possibilities in gameplay. God mode, Invisibility, Eternity? We got it!
