Product Information

Product ID V3277

CAS No. 10191-41-0

Chemical Name

Synonym D,L- α -Tocopherol, (+)- α -Tocopherol, Ephanyl

Formula $C_{29}H_{50}O_2$

Formula Wt. 430.7

Melting Point 3°C

Purity $\geq 98\%$

Solubility Soluble in ethanol, ether, chloroform, acetone or vegetable oils.

Store Temp 4°C

Ship Temp Ambient

Description D,L- α -Tocopherol is a synthetic form of vitamin E that exhibits antioxidative, anti-atherosclerotic, neuroprotective, and anticoagulant activities. Vitamin E is found naturally as D- α -tocopherol. Out of all of the forms of vitamin E, α -tocopherols are the most biologically active. This compound is occasionally found in commercial dietary supplements. In macrophages, this form of vitamin E decreases oxidation of LDL and ox-LDL-induced toxicity; in similar animal models, this compound inhibits the development of atherosclerotic lesions. Additionally, D,L- α -tocopherol inhibits platelet aggregation.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
V3277	5 g	\$30.00
V3277	25 g	\$42.00
V3277	100 g	\$137.90
V3277	250 g	\$242.60
