**Description**
H8 is a nonspecific inhibitor of PKA that modulates Ca2+ signaling pathways.

**Chemical Name**
N-(2-(methylamino)ethyl)- dihydrochloride 5-Isoquinolinesulfonamide

**Formula**
C₁₂H₁₅N₃O₂S 2HCl

**Formula Wt.**
338.25

**Purity**
≥98%

**Solubility**

**Store Temp**
4°C

**Ship Temp**
Ambient

**References**

**Caution:** This product is intended for laboratory and research use only. It is not for human or drug use.
