

Product Information

Product ID G3554

CAS No. 68406-26-8

Chemical Name

Synonym

Formula $C_{53}H_{90}O_{22}$

Formula Wt. 1079.27

Melting Point

Purity $\geq 98\%$

Solubility

Store Temp 4° C

Ship Temp Ambient

Description Ginsenoside Rb3 is a triterpene saponin originally found in species of *Panax* (ginseng) that exhibits cardioprotective, antioxidative, antidepressant, and anti-diabetic activities. Ginsenoside Rb3 inhibits contractions in aortic rings and suppresses expression of ROS, NOX-2, and NOX-4, decreasing oxidative stress and improving endothelial function. In diabetic mice, ginsenoside Rb3 decreases blood glucose levels and improves oral glucose tolerance. Ginsenoside Rb3 also decreases immobility time in the forced swim, tail suspension, and learned helplessness tests. Additionally, this compound decreases levels of malondialdehyde and increases activity of superoxide dismutase, decreasing infarct size in animal models of myocardial ischemia/reperfusion.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
G3554	5 mg	\$180.00
G3554	10 mg	\$329.50
G3554	25 mg	\$599.30
