

Product Information

Product ID D1774

CAS No. 100643-71-8

Chemical Name 8-Chloro-6,11-dihydro-11-(4-piperidinylidene)-5H- benzo[5,6] cyclohepta[1,2,b]pyridine

Synonym Clarinex

Formula C₁₉H₁₉ClN₂

Formula Wt. 310.82

Melting Point 150-151 °C

Purity ≥97%

Solubility Soluble in methanol and ethanol.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
D1774	100 mg	\$98.00
D1774	500 mg	\$275.00
D1774	1 g	\$450.00

Store Temp 4 °C

Ship Temp Ambient

Description Desloratadine is a non-sedating tricyclic antihistamine that inhibits H1 histamine receptors. Desloratadine is an active metabolite of loratadine that exhibits anti-allergic, anti-asthma, and anti-inflammatory activities. Desloratadine inhibits histamine-induced bronchoconstriction and is clinically used to treat allergic rhinitis and chronic idiopathic urticaria. This compound also acts as a functional inhibitor of acid sphingomyelinase (FIASMA).
