Product Information

Product ID G1646

CAS No. 30562-34-6

Chemical Name

Synonym BRN 1633093

Formula $C_{29}H_{40}N_2O_9$

Formula Wt. 560.64

Melting Point 265-268°C

Purity ≥97%

Solubility Soluble in DMSO.

Store Temp -20°C

Ship Temp Ambient

Description Geldanamycin is an inhibitor of heat shock protein 90 (HSP90) that exhibits antiviral, neuroprotective, and anticancer activities. Geldanamycin decreases viral titers and inflammation in animal models of Chikungunya virus infection. Geldanamycin also accelerates nerve regeneration and enhances functional recovery in animal models of nerve crush injury. Additionally, geldanamycin sensitizes various cancer cell lines to the effects of other co-administered chemotherapeutics.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
G1646	100 µg	\$30.00
G1646	5 x 100 µg	\$112.40
G1646	1 mg	\$142.30
