Product Information

Product ID S1059

CAS No. 6533-68-2

Chemical Name

Synonym Scopolamine hydrobromide, Scopolammonium

Formula $C_{17}H_{21}NO_4 \cdot HBr \cdot 3H_2O$

Formula Wt. 438.32

Melting Point 195°C

Purity ≥98%

Solubility Soluble in water (≥600 mg/mL), ethanol (50 mg/mL). Slightly soluble in chloroform.

Store Temp Ambient

Ship Temp Ambient

Description Scopolamine is a tropane alkaloid found in *Solanaceae* family plants that exhibits antiemetic and anticholinergic activities. Scopolamine inhibits muscarinic acetylcholine receptors (mAChRs) with a moderate selectivity for M1 mAChRs. Scopolamine is used to induce cognitive deficits in animal models of Alzheimer's disease. Additionally, scopolamine displays some antidepressant activity and has previously been used in the treatment of organophosphate poisoning.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
S1059	1 g	\$81.70
S1059	5 g	\$255.30
S1059	25 g	\$714.70
