**Granisetron Hydrochloride**

**Product ID** G6802  
**CAS No.** 107007-99-8

**Chemical Name** Endo-1-methyl-N-(9-methyl-9-aza bicyclo [3.3.1]non-3-yl)-1H-indazole-3-carboxamide hydrochloride

**Description** Granisetron is an antagonist at 5-HT3 receptors that exhibits antiemetic and anti-inflammatory activities. Unlike most similar-acting antiemetics, granisetron does not affect the cytochrome p450 metabolizing system. In animal models of colitis, this compound inhibited post-inflammatory visceral sensitivity.
