

Product Information

Product ID H9716

CAS No. 68392-35-8

Chemical Name

Synonym Afimoxifene

Formula C₂₆H₂₉NO₂

Formula Wt. 387.51

Melting Point

Purity ≥97%

Solubility

Store Temp -20° C

Ship Temp Ambient

Description (E,Z)-4-Hydroxytamoxifen is a mixture of cis- and trans-isomers of 4-hydroxytamoxifen. 4-Hydroxytamoxifen is the active metabolite of tamoxifen, a selective estrogen receptor modulator (SERM) that acts as an agonist or antagonist in various tissues. 4-Hydroxytamoxifen exhibits anticancer chemotherapeutic activity, inducing autophagy and vacuole formation as well as KRAS degradation in various cancer cell lines. In cardiac myocytes, 4-hydroxytamoxifen decreases Ca²⁺ amplitude, slowing relaxation and decreasing contractility.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
H9716	5 mg	\$44.90
H9716	10 mg	\$75.80
H9716	25 mg	\$154.60
