

# Safety Data Sheet

#### Section 1. Product and Company Identification

| Product Name<br>Product ID  | Luteinizing Hormone Releasing Hormone, salmon<br>L8278                                                                                             |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| Chemical Name<br>(Synonyms) | Gonadotropin-releasing hormone (salmon), LHRH, GnRH                                                                                                |
| Supplier                    | LKT Laboratories, Inc<br>545 Phalen Blvd.<br>St. Paul, MN 55130 USA<br>Ph: 651-644-8424 Fax: 651-644-8357<br>www.lktlabs.com - getinfo@lktlabs.com |
| Emergency Phone #           | 1-800-424-9300                                                                                                                                     |

#### Section 2. Hazards Identification

GHS Classification Reproductive toxicity (Category 1B) H360

### GHS Label elements including precautionary statements

Signal word Danger

Hazard and precautionary statements Hazard statement

H360 - May damage fertility or the unborn child.

#### **Precautionary statements**

- P201 Obtain special instructions before use.
  P202 Do not handle until all safety precautions have been read and understood.
  P281 Use personal protective equipment as required.
  P308 + P313 IF exposed or concerned: Get medical advice/ attention.
  P405 Store locked up.

- P501 Dispose of contents/ container to an approved waste disposal plant.

| HMIS Classification      | Health hazard: 0<br>Chronic health hazard: *<br>Flammability: 0<br>Physical hazard: 0                                                                                                             |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NFPA Rating              | Health hazard: 0<br>Fire hazard: 0<br>Reactivity hazard: 0                                                                                                                                        |
| Potential Health Effects | Inhalation - May be harmful if inhaled. May cause respiratory tract irritation.<br>Skin - May be harmful if absorbed through skin. May cause skin irritation.<br>Eyes - May cause eye irritation. |

Ingestion - May be harmful if swallowed. Reproductive toxicity - May damage fertility or the unborn child.

|                                                              | Section 3. Composition/Information on Ingredients                                                                                                                  |  |  |  |  |

| General advice                                               | Consult a physician. Show this safety data sheet to the doctor in attendance.                                                                                      |  |  |  |  |
| Eye Contact                                                  | Flush eyes with water as a precaution.                                                                                                                             |  |  |  |  |
| Skin Contact                                                 | Wash off with soap and plenty of water. Consult a physician.                                                                                                       |  |  |  |  |
| Inhalation                                                   | If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.                                                    |  |  |  |  |
| Ingestion                                                    | Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.                                                                |  |  |  |  |
|                                                              | Section 5 . Firefighting Measures                                                                                                                                  |  |  |  |  |
| Flash Point                                                  | Not available.                                                                                                                                                     |  |  |  |  |
| Extingushing Media                                           | Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.                                                                                           |  |  |  |  |
| Firefighting Procedures                                      | Wear self-contained breathing apparatus for firefighting if necessary.                                                                                             |  |  |  |  |
| Unusual Fire Hazards                                         | Carbon oxides, nitrogen oxides (NOx).                                                                                                                              |  |  |  |  |
|                                                              | Section 6. Accidental Release Measures                                                                                                                             |  |  |  |  |
| Personal Precautions                                         | Use personal protective equipment. Avoid dust formation. Avoid breathing dust, vapors, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. |  |  |  |  |
| Environmental Precautions                                    | Prevent further leakage or spillage if safe to do so. Do not let product enter drains.                                                                             |  |  |  |  |
| Methods and materials<br>for containment and cleanup         |                                                                                                                                                                    |  |  |  |  |
|                                                              | Section 7. Handling and Storage                                                                                                                                    |  |  |  |  |
| Handling                                                     | Avoid formation of dust and aerosols. Provide appropriate exhaust ventilation at places where dust is formed.                                                      |  |  |  |  |
|                                                              | Keep container tightly closed in a dry and well-ventilated place.                                                                                                  |  |  |  |  |
| Storage Conditions                                           | Recommended storage temperature: -20°C                                                                                                                             |  |  |  |  |
| Storage Conditions<br>Hazardous<br>Decomposition<br>Products |                                                                                                                                                                    |  |  |  |  |

#### Section 8. Exposure Controls/Personal Protection

## Personal protective EXPOSURE CONTROLS

equipment Contains no substances with occupational exposure limit values.

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday

## PERSONAL PROTECTION

Eye/face protection: Safety glasses with side-shields conforming to EN 166. Use equipment for eye protection Skin protection: Handle with glove's outer surface) to avoid skin contact with this product. Dispose of technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

**Body protection:** Impervious clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. **Respiratory protection:** Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Section 9. Physical and Chemical Properties Solid. White to off-white powder. **Physical State** Color Not available. Not available. **Boiling Point** Volatility Not available. Not available. **Melting Point** Density Soluble in DMSO. Not available. Solubility pН Not available. Not available. Ignition Flash Point temperature Not available. Not available. Autoignition Lower explosion limit temperature Not available. Not available. Vapor **Upper explosion limit** pressure Not available. Not available. Water solubility Odor Partition coefficient: Not available. Not available. Odor n-octanol/water Threshold Relative vapor density Not available. Not available. Evaporation rate

#### Section 10. Stability and Reactivity

Stable under recommended storage conditions. Stability Strong oxidizing agents. **Materials To Avoid** Hazardous Hazardous decomposition products formed under fire conditions. - Carbon oxides, nitrogen oxides (NOx). Decomposition Products

## Possibility of Not available. hazardous reactions

Not available.

Conditions to avoid

| Section 11. Toxicological Information           |                                                                                                                                                                                                                                                                                                                                                                |                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |  |

Section 12. Ecological Information

Toxicity Not available.

Mobility in soil Not available.

## Other adverse effects Not available.

Bioaccumulative potential Not available.

## Section 13. Disposal Considerations

Waste Dispose of material according to all federal, state and local regulations.Waste DisposalOffer material to a licensed, professional waste disposal company to dispose of as unused product.

#### Section 14. Transport Information

DOT (US) Not dangerous goods.

- IATA Not dangerous goods.
- IMDG Not dangerous goods.
