Product ID: D3331  
CAS No.: 58436-28-5  
Chemical Name: α, β-Dihydroresveratrol  

Synonym: α, β-Dihydro-3,4',5'-trihydroxystilbene  

Formula: C_{14}H_{14}O_{3}  
Formula Wt.: 230.26  
Melting Point:  
Purity: ≥98%  
Solubility:  

Store Temp: -20°C  
Ship Temp: Ambient  

Description: α,β-Dihydroresveratrol is a polyphenol found in many food sources and is a major metabolite of resveratrol. α,β-dihydroresveratrol may have better bioavailability than its parent compound. α,β-dihydroresveratrol may be involved in resveratrol’s anticancer chemotherapeutic and chemopreventive activities and also may modulate voltage-gated K+ channels.
