

Product Information

Product ID E7578

CAS No. 2998-57-4

Chemical Name

Synonym

Formula $C_{23}H_{31}Cl_2NO_3$

Formula Wt. 440.40

Melting Point 104.5°C

Purity ≥97%

Solubility

Store Temp 4°C

Ship Temp Ambient

Description Estramustine is a derivative of estradiol and the nitrogen mustard mechlorethamine that is clinically used to treat prostate cancer. Estramustine primarily exerts its anticancer chemotherapeutic activity through antimitotic actions. Estramustine acetylates microtubules, stabilizing them and inducing depolymerization, resulting in apoptosis across a variety of cancer cell types. Estramustine also increases DNA fragmentation in glioma cells and tumors (in vivo), but not in normal tissue.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
E7578	25 mg	\$78.00
E7578	100 mg	\$165.30
E7578	250 mg	\$329.50
E7578	1 g	\$1018.80
