

Product Information

Product ID V0269

CAS No. 224789-15-5

Chemical Name 2-[2-ethoxy-5-(4-ethylpiperazin-1-yl)sulfonylphenyl]-5-methyl-7-propyl-1H-imidazo[5,1-f][1,2,4]triazin-4-one;dihydrochloride

Synonym

Formula $C_{23}H_{32}N_6O_4S \cdot 2HCl$

Formula Wt. 561.52

Melting Point

Purity $\geq 99\%$

Solubility

Store Temp Ambient

Ship Temp Ambient

Description Vardenafil is a centrally-acting phosphodiesterase 5 (PDE5) inhibitor that is clinically used to treat erectile dysfunction. Vardenafil also exhibits antioxidative and antihypertensive activities and shows some potential for synergistic chemotherapeutic ability through its modulation of cGMP-NO signaling. This compound increases expression of NO and eNOS as well as activity of superoxide dismutase, decreasing oxidative stress, pulmonary vascular resistance, and right ventricular hypertrophy and increasing cardiac output in animal models of pulmonary arterial hypertension (PAH). Vardenafil decreases proteinuria and glomerular damage in animal models of diabetic nephropathy-induced cGMP pathway dysfunction. In cellular models, vardenafil decreases secretion of IL-8 and expression of oxidative LDLR (LOX-1), suggesting potential benefit in the treatment of benign prostatic hyperplasia/low urinary tract syndrome (BPH/LUTS).

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
V0269	10 mg	\$87.60
V0269	25 mg	\$126.30
V0269	100 mg	\$340.30
