Product Information

Product ID H9812

CAS No. 154-02-9

Chemical Name

Synonym 2-(5-Hydroxy-3-indolyl)ethyl alcohol

Formula $C_{10}H_{11}NO_2$

Formula Wt. 177.20

Melting Point

Purity $\geq 98\%$

Solubility PBS to 0.3 mg/ml, ethanol to 30 mg/ml, DMSO to 30 mg/ml

Store Temp 4°C

Ship Temp Ambient

Description 5-hydroxytryptophol is a neuromodulatory analog of serotonin and melatonin found in the needles of the *Pinus sylvestris* tree, wine, and beer, and is also the sleep-inducing component of the 'sleeping sickness' initially produced by the *Trypanosoma brucei* parasite. This compound is often used as a biomarker for recent alcohol consumption as it remains in the body much longer than ethanol. 5-hydroxytryptophol exudes some hypnotic activity, inducing a short-lived sleep state, and marginal antioxidative properties, inhibiting oxidation of LDL in a developmental atherosclerosis model.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
H9812	10 mg	\$52.50
H9812	25 mg	\$112.40
H9812	100 mg	\$262.20
