Product Information

Product ID P4492

CAS No. 918505-84-7

Chemical Name N-[3-(5-chloro-1H-pyrrolo[2,3-b]pyridine-3-carbonyl)-2,4-difluorophenyl]propane-1-sulfonamide

Synonym PLX-4720

Formula C₁₇H₁₄ClF₂N₃O₃S

Formula Wt. 413.83

Melting Point

Purity ≥98%

Solubility DMSO 83 mg/mL (200.56 mM)
Water Insoluble
Ethanol Insoluble

Store Temp -20°C

Ship Temp Ambient

Description PLX4720 is an orally available ATP-competitive kinase inhibitor specific for mutant (V600E) B-Raf, which is present in a variety of cancer subtypes. PLX4720 is an analog of vemurafenib. This compound is being examined as a treatment for unresectable or metastatic melanomas. Inhibition of B-Raf by PLX4720 induces apoptosis and autophagy in tumor cells, resulting in decreased tumor growth and increased survival in vitro and in vivo. Additional downstream effects of B-Raf inhibition by PLX4720 include downregulation of expression of angiogenic factors, enhancement of surface expression of tumor-associated antigens on tumor cells, and alterations of trafficking of local immune cells such as CD8⁺ T lymphocytes.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
P4492	5 mg	\$102.20
P4492	25 mg	\$283.70
