Product Information

Product ID G8800

CAS No. 452342-67-5

Chemical Name

Synonym GW788388, GW 788388

Formula $C_{25}H_{23}N_5O_2$

Formula Wt. 425.49

Melting Point

Purity $\geq 97\%$

Solubility DMSO Solubility:
15 mg/mL (35.25 mM)

Store Temp -20°C

Ship Temp Ambient

Description GW-788388 inhibits activin receptor-like kinase 5 (ALK5), suppressing TGF- β activity; it exhibits anti-fibrotic and cardioprotective activities. GW-788388 increases survival in studies of Trypanosoma infection and prevents Chagas disease-induced development of cardiac fibrosis. This compound also attenuates systolic dysfunction and left ventricular remodeling in animal models of myocardial infarction. In animal models of diabetes, GW-788388 decreases the occurrence of renal fibrosis.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
G8800	1 mg	\$62.50
G8800	5 mg	\$119.60
G8800	25 mg	\$372.30
